In a gripping story of international power and deception, Jeffrey Engel reveals the "special relationship" between the United States and Great Britain in a new and far more competitive light. As allies, they fought communism. As rivals, they locked horns over which would lead the Cold War fight. In the quest for sovereignty and hegemony, one important key was airpower, which created jobs, forged ties with the developing world, and, perhaps most importantly in a nuclear world, ensured military superiority. Only the United States and Britain were capable of supplying the post-war world's ravenous appetite for aircraft. The Americans hoped to use this dominance as a bludgeon not only against the Soviets and Chinese, but also

against any ally that deviated from Washington's rigid brand of anticommunism. Eager to repair an economy shattered by war and never as committed to unflinching anticommunism as their American allies, the British hoped to sell planes even beyond the Iron Curtain, reaping profits, improving East-West relations, and garnering the strength to withstand American hegemony. Engel traces the bitter fights between these intimate allies from Europe to Latin America to Asia as each sought control over the sale of aircraft and technology throughout the world. The Anglo-American competition for aviation supremacy affected the global balance of power and the fates of developing nations such as India, Pakistan, and China. But without aviation, Engel argues, Britain would never have had the strength to function as a brake upon American power, the way trusted allies should. Here is everything you need to know to build your own low temperature differential (LTD) Stirling engines without a machine shop. These efficient hot air engines will run while sitting on a cup of hot water, and can be fine-tuned to run from the heat of a warm hand. Four engine projects are included. Each project includes a parts list, detailed drawings, and illustrated step-by-step assembly instructions. The parts and materials needed for these projects are easily obtained from local hardware stores and model shops, or ordered online. Jim Larsen's innovative approach to Stirling engine design helps you

achieve success while keeping costs low. All of the engines described in this book are based on a conventional pancake style LTD Stirling engine format. These projects introduce the use of Teflon tubing as an alternative to expensive ball bearings. An entire chapter is devoted to the research and testing of various materials for hand crafted bearings. The plans in this book are detailed and complete. This collection of engine designs is a stand-alone companion to Jim Larsen's first book, "Three LTD Stirling Engines You Can Build Without a Machine Shop." Would you like to grow revenue faster? Whether you own a company, lead a sales team, or work in marketing, we all share the same goal: revenue growth. Unfortunately, many companies are not growing as fast as they could be. You are running marketing campaigns. Your sales team is making calls. What's keeping you from growing faster? Every company has a Revenue Growth Engine. This is the sum of their sales and marketing efforts. The problem is that most engines are not firing on all cylinders. There may even be important cylinders missing. The good news is that when your Revenue Growth Engine is performing with all cylinders firing, you accelerate revenue growth! In this book, you will quickly discover which parts of your company's growth engine are not performing. You will find a big picture model for aligning marketing and sales to drive growth. Then, Darrell walks you step by step through

how to improve each component of your growth engine. Popular Science gives our readers the information and tools to improve their technology and their world. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1917 edition. Excerpt: ... (6) Columns for Discount on Purchases and Discount on Notes on the same side of the Cash Book; (c) Columns for Discount on Sales and Cash Sales on the debit side of the Cash Book; (d) Departmental columns in the Sales Book and in the Purchase Book. Controlling Accounts.-- The addition of special columns in books of original entry makes possible the keeping of Controlling Accounts. The most common examples of such accounts are Accounts Receivable account and Accounts Payable account. These summary accounts, respectively, displace individual customers' and creditors' accounts in the Ledger. The customers' accounts are then segregated in another book called the Sales Ledger or Customers' Ledger, while the creditors' accounts are kept in the Purchase or Creditors' Ledger. The original Ledger, now much reduced in size, is called the

General Ledger. The Trial Balance now refers to the accounts in the General Ledger. It is evident that the task of taking a Trial Balance is greatly simplified because so many fewer accounts are involved. A Schedule of Accounts Receivable is then prepared, consisting of the balances found in the Sales Ledger, and its total must agree with the balance of the Accounts Receivable account shown in the Trial Balance. A similar Schedule of Accounts Payable, made up of all the balances in the Purchase Ledger, is prepared, and it must agree with the balance of the Accounts Payable account of the General Ledger." The Balance Sheet.--In the more elementary part of the text, the student learned how to prepare a Statement of Assets and Liabilities for the purpose of disclosing the net capital of an enterprise. In the present chapter he was shown how to prepare a similar statement, the Balance Sheet. For all practical... Excerpt from Ericsson's Caloric Engine: General Agency and Depot for the Sale of Caloric Engines A result more important in view of the number of engines employed is exhibited on the New York Central Railroad, on the line of which there are now some 20 of these engines in daily use. Mr. Chauncey Vibbard, the Superintendent of that road, reports, over his Official signature, after several months' experience with a number of these engines, that they perform an incredible amount Of labor for the small quantity of fuel consumed. One

of them, he says, for 96-100 of a cent per hour, does the work formerly done by four men, at an expense of \$25 each per month. Another of the same size, at the Savannah station, at an expense of eleven cents a day. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
