The German Myth of the East May 20 2020 An examination of the various different expressions of the distinctive German 'myth of the East' that has been such a marked feature of German culture over the last two centuries, influencing German attitudes both to Eastern Europe itself and also to Germans' own sense of identity.

From the Shabs to Los Angeles Feb 09 2022 A fascinating look at the lives, culture, and religious and ritual observance of three generations of Iranian Jewish women in the United States.

New York Magazine Apr 18 2020 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Consuming Identities Dec 19 2022 Along with the rapid expansion of the market economy and industrial production methods, such innovations as photography, lithography, and steam printing created a pictorial revolution in nineteenth-century society. The proliferation of visual prints, ephemera, spectacles, and technologies transformed public

values and perceptions, and its legacy was as significant as the print revolution that preceded it. *Consuming Identities* explores the significance of the pictorial revolution in one of its vanguard cities: San Francisco, the revolving door of the gold rush. In their correspondence, diaries, portraits, and reminiscences, thousands of migrants to the city by the Bay demonstrated that visual media constituted a central means by which people navigated the bewildering host of changes taking hold around them in the second half of the nineteenth century, from the spread of capitalism and class formation to immigration and urbanization. Images themselves were inextricably associated with these world-changing forces; they were commodities, but as representations of people, they also possessed special cultural qualities that gave them new meaning and significance. Visual media transcended traditional boundaries of language and culture that divided diverse groups within the same urban space. From the 1848 conquest of California and the gold discovery to the disastrous earthquake and fire of 1906, San Francisco anticipated broader cultural transformations in the commodification, implementation, and popularity of images. For the city's inhabitants and sojourners, an array of imagery came to mediate, intersect with, and even constitute social interaction in a world where virtual reality was becoming normative.

National Identity in EU Law Aug 03 2021 Despite nearly sixty years of European integration, neither nations nor national loyalties have withered away. On the contrary, national identity rhetoric seems on the rise, not only in politics but also in legal

discourse. Lately we have seen a rise in the number of Member States invoking their national identity in an attempt to justify a derogation from a requirement imposed on them by a Treaty article or an EU legislative act, or to legitimize a particular national reading of such an EU norm. Despite this, the European Court of Justice (ECJ) has yet to develop a coherent approach to such arguments, or express a vision of the role national identity should play in EU law. Elke Cloots undertakes this task by providing a principled and coherent scheme for the adjudication of disputes involving claims based on the national identity of a Member State. Should arguments involving national identity be legally relevant? If yes, how should the ECJ approach such identity-related interests? Cloots crafts a normative framework to assist the ECJ in striking the right balance between European integration and respect for the identity concerns at issue. The book combines rigorous theoretical inquiry with thorough analysis of the European Treaties and case law, with particular attention paid to litigation involving domestic measures concerning the national system of government, constitutional rights protections, and language policy. Clarifying the issues at stake and presenting a solution to these problems, this book will be an invaluable resource for the academics, lawyers, and policy makers in the field.

Gym Culture, Identity and Performance-Enhancing Drugs Oct 17 2022 This book is about gym culture, the pursuit of fit, muscular bodies and the use of drugs as a means to get there. Building on the international research literature and in-depth

interviews with men who have experience of image and performance enhancing drugs (IPEDs), the book explores the fascination with muscles, motivations for using drugs to enhance them, assessments of risks, and experience of side effects. The book examines what the altered body does to the men's identity, self-image and relationships with peers and partners. Taking an evolutionary psychological approach, it also investigates the biological and psychological foundations of the fascination with the muscular body and discusses the notion of precarious manhood. Building on these analyses the book considers the political and regulatory initiatives in place to prevent the use of IPEDs and assesses those strategies' potential to reach their aims. This is essential reading for anybody with an interest in the issue of drugs in sport, the ethics of sport, sociology of sport, sociology of the body, masculinity or public health.

Hyper Sexual, Hyper Masculine? Jul 22 2020

Presenting new interview and auto-ethnographic data, and drawing on an array of theoretical approaches methodologies, *Hyper Sexual, Hyper Masculine?* explores the formation of gendered and sexual identity in the lives of black men, shedding light on the manner in which these are affected by class and social structure. It examines the intersecting oppressions of race, gender and class, while acknowledging and discussing the extent to which black men's social lives differ as a result of their varying degrees of cumulative disadvantage.

Food and Identity in Nineteenth and Twentieth Century Ghana Jan 20 2023 This book investigates how cooking, eating, and identity are connected to the local micro-climates in each of Ghana's major eco-culinary zones. The work is based on several years of researching Ghanaian culinary history and cuisine, including field work, archival research, and interdisciplinary investigation. The political economy of Ghana is used as an analytical framework with which to investigate the following questions: How are traditional food production structures in Ghana coping with global capitalist production, distribution, and consumption? How do land, climate, and weather structure or provide the foundation for food consumption and how does that affect the separate traditional and capitalist production sectors? Despite the post WWII food fight that launched Ghana's bid for independence from the British empire, Ghana's story demonstrates the centrality of local foods and cooking to its national character. The cultural weight of regional traditional foods, their power to satisfy, and the overall collective social emphasis on the 'proper' meal, have persisted in Ghana, irrespective of centuries of trade with Europeans. This book will be of interest to scholars in food studies, comparative studies, and African studies, and is sure to capture the interest of students in new ways.

Encyclopedia of the Mind Mar 10 2022 It's hard to
conceive of a topic of more broad and personal
interest than the study of the mind. In addition to
its traditional investigation by the disciplines of
psychology, psychiatry, and neuroscience, the mind
has also been a focus of study in the fields of
philosophy, economics, anthropology, linguistics,
computer science, molecular biology, education, and
literature. In all these approaches, there is an
almost universal fascination with how the mind works
and how it affects our lives and our behavior.
Studies of the mind and brain have crossed many
exciting thresholds in recent years, and the study
of mind now represents a thoroughly cross-
disciplinary effort. Researchers from a wide range
of disciplines seek answers to such questions as:
What is mind? How does it operate? What is
consciousness? This encyclopedia brings together
scholars from the entire range of mind-related
academic disciplines from across the arts and
humanities, social sciences, life sciences, and
computer science and engineering to explore the
multidimensional nature of the human mind.

Identity, Culture, and the Science Performance,
Volume 1 Feb 21 2023 Identity, Culture, and the

Science Performance, Volume 1: From the Lab to the Streets is the first of two volumes dedicated to the diverse sociocultural work of science-oriented performance. A dynamic volume of scholarly essays, interviews with scientists and artists, and creative entries, it examines explicitly public-facing science performances that operate within and for specialist and non-specialist populations. The book's chapters trace the theatrical and ethical contours of live science events, re-enact historical stagings of scientific expertise, and demonstrate the pedagogical and activist potentials in performing science in community settings. Alongside the scholarly chapters, From the Lab to the Streets features creative work by contemporary science-integrative artists and interviews with popular science communicators Sahana Srinivasan (host of Netflix's Brainchild) and Raven Baxter ("Raven the Science Maven") and artists from performance ensembles The Olimpias and Superhero Clubhouse. In exploring the science performance as a vital but flawed method of public engagement, it offers a critique of the racist, ableist, sexist, and heteronormative ideologies prevalent across the history of science, as well as highlighting science performances that challenge and redress these ideologies. Along with its complementary volume From the Curious to the Quantum, this book documents the varied ways in which identity categories and cultural constructs are formed and reformed through science performances.

Gay Bombay Apr 11 2022 This was the first ethnography of gay life in contemporary India. It talked about the early age of the internet in the

country and the creation of online-offline gay communities from the mid-1990s to the mid 2000s. The anniversary edition has chapters from leading global scholars about the continuing importance of the book, as well as an updated preface from the author. It has an interview as an afterword that talks about the path ahead for queer rights in India, in the context of the recent Supreme Court judgement decriminalizing homosexuality.

The East German Novel Dec 27 2020

Byzantine Macedonia Jun 20 2020 This is volume 1 of the proceedings of the Byzantine Macedonia conference held in Melbourne in 1995. These nineteen papers are invaluable to anyone interested in the Macedonian heritage or in the economy, administration, history and representation of Macedonia during the course of the Byzantine empire. Vol. 2, Byzantine Macedonia: Art, Architecture, Music and Hagiography, edited by R. Scott and J. Burke, is published separately by the National Centre for Hellenic Studies and Research, La Trobe University, Melbourne.

Illegal Aliens Jan 28 2021

Soul Identity Jun 13 2022 You can't take it with you... but what if you could? Most people believe their souls outlive their bodies. Most people would find an organization that tracks their souls into the future and passes on their banked money and memories compelling. Scott Waverly isn't like most people. He spends his days finding and fixing computer security holes. And Scott is skeptical of his new client's claim that they have been calculating and tracking soul identities for almost twenty-six hundred years. Are they running a freaky

cult? Or a sophisticated con job? Scott needs to save Soul Identity from an insider attack. Along the way, he discovers the importance of the bridges connecting people's lives.

Trigonometry Apr 30 2021 Designed for the one-term course in trigonometry, the Third Edition incorporates all of the many teaching and learning tools that have made Zill's texts a resounding success. A rich pedagogy and an extensive supplements package make this text a must-have resource for students and instructors alike. Zill takes care to include a full set of engaging and motivating features for students including, a wide range of word problems and specific applications, historical accounts of mathematicians, and a strong variety of relevant exercises. These extensive exercises give students the opportunity to test their comprehension, challenge their understanding, and apply their knowledge to real-world situations.

Learning Queer Identity in the Digital Age Mar 18
2020 This book explores, through specific analysis of media representations, personal interviews, and historical research, how the digital environment perpetuates harmful and limiting stereotypes of queerness. Siebler argues that heteronormativity has

co-opted queer representations, largely in order to sell goods, surgeries, and lifestyles, reinforcing instead of disrupting the masculine and feminine heterosexual binaries through capitalist consumption. *Learning Queer Identity in the Digital Age* focuses on different identity populations (gay, lesbian, transgender) and examines the theories (queer, feminist, and media theories) in conjunction with contemporary representations of each identity group. In the twenty-first century, social media, dating sites, social activist sites, and videos/films, are primary educators of social identity. For gay, lesbian, bisexual, transgendered, and transsexual peoples, these digital interactions help shape queer identities and communities.

Secret Identity Crisis _____ May 12 2022 What Cold War-era superheroes reveal about American society and foreign policy Physicist Bruce Banner, caught in the nuclear explosion of his experimental gamma bomb, is transformed into the rampaging green monster, the Hulk. High school student Peter Parker, bitten by an irradiated spider, gains its powers and becomes Spiderman. Reed Richards and his friends are caught in a belt of cosmic radiation while orbiting the Earth in a spacecraft and are transformed into the Fantastic Four. While Stan Lee suggests he clung to the hackneyed idea of radioactivity in creating Marvel's stable of superheroes because of his limited imagination, radiation and the bomb are nonetheless the big bang that spawned the Marvel universe. The Marvel superheroes that came to dominate the comic book industry for most of the last five decades were born under the mushroom cloud of potential nuclear war that was a cornerstone of

the four-decade bipolar division of the world between the US and USSR. These stories were consciously set in this world and reflect the changing culture of cold War (and post-cold War) America. Like other forms of popular entertainment, comic books tend to be very receptive to cultural trends, reflect them, comment on them, and sometimes inaugurate them. *Secret Identity Crisis* follows the trajectory of the breakdown of the cold War consensus after 1960 through the lens of superhero comic books. Those developed by Marvel, because of their conscious setting in the contemporary world, and because of attempts to maintain a continuous story line across and within books, constitute a system of signs that reflect, comment upon, and interact with the American political economy. This groundbreaking new study focuses on a handful of titles and signs that specifically involve political economic codes, including Captain America, the Invincible Iron Man, Nick Fury, Agent of SHIELD, the Incredible Hulk to reveal how the American self was transformed and/or reproduced during the late Cold War and after.

British Dramatists Since World War II

Feb 26 2021

Queer Wars Dec 15 2019 The claim that 'LGBT rights are human rights' encounters fierce opposition in many parts of the world, as governments and religious leaders have used resistance to 'LGBT rights' to cast themselves as defenders of traditional values against neo-colonial interference and western decadence. *Queer Wars* explores the growing international polarization over sexual rights, and the creative responses from social movements and activists, some of whom face murder,

imprisonment or rape because of their perceived sexuality or gender expression. This book asks why sexuality and gender identity have become so vexed an issue between and within nations, and how we can best advocate for change.

Encyclopedia of Management Theory Nov 06 2021 In discussing a management topic, scholars, educators, practitioners, and the media often toss out the name of a theorist (Taylor, Simon, Weber) or make a sideways reference to a particular theory (bureaucracy, total quality management, groupthink) and move on, as if assuming their audience possesses the necessary background to appreciate and integrate the reference. This is often far from the case. Individuals are frequently forced to seek out a hodgepodge of sources varying in quality and presentation to provide an overview of a particular idea. This work is designed to serve as a core reference for anyone interested in the essentials of contemporary management theory. Drawing together a team of international scholars, it examines the global landscape of the key theories and the theorists behind them, presenting them in the context needed to understand their strengths and weaknesses to thoughtfully apply them. In addition to interpretations of long-established theories, it also offers essays on cutting-edge research as one might find in a handbook. And, like an unabridged dictionary, it provides concise, to-the-point definitions of key concepts, ideas, schools, and figures. Features and Benefits: Two volumes containing over 280 signed entries provide users with the most authoritative and thorough reference resources available on management theory, both in

terms of breadth and depth of coverage. Standardized presentation format, organized into categories based on validity and importance, structures entries so that readers can assess the fundamentals, evolution, and impact of theories. To ease navigation between and among related entries, a Reader's Guide groups entries thematically and each entry is followed by Cross-References. In the electronic version, the Reader's Guide combines with the Cross-References and a detailed Index to provide robust search-and-browse capabilities. An appendix with a Chronology of Management Theory allows readers to easily chart directions and trends in thought and theory from early times to the present. An appendix with Central Management Insights allows readers to easily understand, compare, and apply major theoretical messages of the field. Suggestions for Further Reading at the end of each entry guide readers to sources for more detailed research and discussion. Key themes include: Nature of Management Managing People, Personality, and Perception Managing Motivation Managing Interactions Managing Groups Managing Organizations Managing Environments Strategic Management Human Resources Management International Management and Diversity Managerial Decision Making, Ethics, and Creativity Management Education, Research, and Consulting Management of Operations, Quality, and Information Systems Management of Entrepreneurship Management of Learning and Change Management of Technology and Innovation Management and Leadership Management and Social / Environmental Issues PLUS: Appendix of Chronology of Management Theory PLUS: Appendix of Central Management Insights

Black Mosaic Oct 05 2021 Historically, Black Americans have easily found common ground on political, social, and economic goals. Yet, there are signs of increasing variety of opinion among Blacks in the United States, due in large part to the influx of Afro-Latino, Afro-Caribbean, and African immigrants to the United States. In fact, the very definition of "African American" as well as who can self-identity as Black is becoming more ambiguous. Should we expect African Americans' shared sense of group identity and high sense of group consciousness to endure as ethnic diversity among the population increases? In *Black Mosaic*, Candis Watts Smith addresses the effects of this dynamic demographic change on Black identity and Black politics. Smith explores the numerous ways in which the expanding and rapidly changing demographics of Black communities in the United States call into question the very foundations of political identity that has united African Americans for generations. African Americans' political attitudes and behaviors have evolved due to their historical experiences with American Politics and American racism. Will Black newcomers recognize the inconsistencies between the American creed and American reality in the same way as those who have been in the U.S. for several generations? If so, how might this recognition influence Black immigrants' political attitudes and behaviors? Will race be a site of coalition between Black immigrants and African Americans? In addition to face-to-face interviews with African Americans and Black immigrants, Smith employs nationally representative survey data to examine these shifts in the attitudes

of Black Americans. Filling a significant gap in the political science literature to date, *Black Mosaic* is a groundbreaking study about the state of race, identity, and politics in an ever-changing America.

On $K^*(Z/n)$ and $K^*(F_q[t]/(t^2))$ Jul 02 2021

Narrating Stance, Morality, and Political Identity

Aug 15 2022 This book offers unique insights into the use of Facebook after the 2016 US presidential election, interrogating how users in private groups draw on individual experiences in movement building and identity construction while also critically reflecting on ethnographic practices around social media. The volume draws on the author's own involvement in a specific Facebook group focused around activism and community organizing in Texas following the 2016 US presidential election.

Chapters draw on the frameworks of "small stories" and "stance" to unpack the ways in which group members use parts of their individual stories to signal beliefs to others, present themselves in relation to the group, and signal virtues of moral authority on various pressing political issues.

Building on these analyses, Zentz goes on to address ways in which the scales of politics are being navigated and modified at the grassroots level in our highly networked world. This book contributes to ongoing conversations about the realities of internet use within linguistic anthropology and new media studies, and how researchers might seek to account for social media use and access to this data as these technologies develop further. This book is key reading for students and scholars in linguistic anthropology, media studies, and activism and social movement studies.

Metaphors of Identity Dec 07 2021 Placing identity within its cultural context, Fitzgerald offers ethnographic case material to examine the meaning and changing metaphors of ethnicity, male and female identity, and aging and identity. He opens up an exciting multidisciplinary dialogue for improving interpersonal and cross-cultural communication. The book provides a clear synthesis of the interrelated meanings of culture, identity, and communication, examining self-concept and its role in the communication process, and exploring cultural and biological research on self, individuality, personality, and mind-body questions.

Performance, Identity, and the Neo-Political Subject Nov 18 2022 This book stages a timely discussion about the centrality of identity politics to theatre and performance studies. It acknowledges the important close relationship between the discourses and practices historically while maintaining that theatre and performance can enlighten ways of being with others that are not limited by conventional identitarian languages. The essays engage contemporary theatre and performance practices that pose challenging questions about identity, as well as subjectivity, relationality, and the politics of aesthetics, responding to neo-liberal constructions and exploitations of identity by seeking to discern, describe, or imagine a new political subject. Chapters by leading international scholars look to visual arts practice, digital culture, music, public events, experimental theatre, and performance to investigate questions about representation, metaphysics, and politics. The collection seeks to foreground shared, universalist

connections that unite rather than divide, visiting metaphysical questions of being and becoming, and the possibilities of producing alternate realities and relationalities. The book asks what is at stake in thinking about a subject, a time, a place, and a performing arts practice that would come 'after' identity, and explores how theatre and performance pose and interrogate these questions.

Brown Gumshoes Sep 16 2022 Popular fiction, with its capacity for diversion, can mask important cultural observations within a framework that is often overlooked in the academic world. Works thought to be merely "escapist" can often be more seriously mined for revelations regarding the worlds they portray, especially those of the disenfranchised. As detective fiction has slowly earned critical respect, more authors from minority groups have chosen it as their medium. Chicana/o authors, previously reluctant to write in an underestimated genre that might further marginalize them, have only entered the world of detective fiction in the past two decades. In this book, the first comprehensive study of Chicano/a detective fiction, Ralph E. Rodriguez examines the recent contributions to the genre by writers such as Rudolfo Anaya, Lucha Corpi, Rolando Hinojosa, Michael Nava, and Manuel Ramos. Their works reveal the struggles of Chicanas/os with feminism, homosexuality, familia, masculinity, mysticism, the nationalist subject, and U.S.-Mexico border relations. He maintains that their novels register crucial new discourses of identity, politics, and cultural citizenship that cannot be understood apart from the historical instability following the demise

of the nationalist politics of the Chicana/o movement of the 1960s and 1970s. In contrast to that time, when Chicanas/os sought a unified Chicano identity in order to effect social change, the 1980s, 1990s, and 2000s have seen a disengagement from these nationalist politics and a new trend toward a heterogeneous sense of self. The detective novel and its traditional focus on questions of knowledge and identity turned out to be the perfect medium in which to examine this new self.

Interpreting 2 Peter through African American Women's Moral Writings Jun 01 2021 Shively T. J. Smith reconsiders what is most distinct, troubling, and potentially thrilling about the often overlooked and dismissed book of 2 Peter. Using the rhetorical strategies of nineteenth-century African American women, including Ida B. Wells, Jarena Lee, Anna Julia Cooper, and others, Smith redefines the use of biblical citations, the language of justice and righteousness, and even the matter of pseudonymity in 2 Peter. She approaches 2 Peter as an instance of Christian cultural rhetoric that forges a particular kind of community identity and behavior. This pioneering study considers how 2 Peter cultivates the kind of human relations and attitudes that speak to the values of moral people seeking justice in the past as well as today.

Diana, A Cultural History Jan 16 2020 This book intervenes in debates over the significance of Diana, Princess of Wales by offering a critical account of her media iconicity from 1981 to the present. It outlines the historical development of representations of Diana, analysing the ways in which the Princess has been understood via

discourses of gender, sexuality, race, economic class, the royal, national identity, and the human. The book then goes on to assess the issues at stake in debates over the 'meaning' of Diana, such as the gender politics of cultural icon-making and deconstruction, and conflicting notions of cultural value.
