Addressing contemporary mental health issues facing psychiatric nursing today, as well as traditional clinical skills, this reference work links stress, trauma, and behavioural health problems to neurobiological function and immune system depletion. This framework pinpoints assessment and selection of intervention strategies especially useful in this era of managed care, focused care, and time-limited treatment. The book describes the

biology of mental illness and psychopharmacological interventions, provides a DSM-IV diagnosis and a psychiatric nursing diagnosis to a patient condition within the context of the nursing care plan, and clearly demonstrates how nurses integrate neurobiological, behavioural, and social science theories and research into patient care. Clearly written, comprehensive coverage of psychiatric mental-health nursing delivers what nursing students need to meet the challenges of health care today. Its evidence-based, holistic approach to nursing practice focuses on both physiological and psychological disorders. Designed to be used in longer psychiatric mental-health nursing courses, this text provides students with a comprehensive grounding in therapeutic approaches as well as must-know DSM-5 disorders and nursing interventions. For 130 psychiatric nursing diagnoses, nurses find definition, assessment criteria, defining characteristics, associated medical diagnoses, patient outcomes, interventions with rationales, documentation, and evaluation criteria. Also included is a section on geriatric mental health. All care plans are organized alphabetically within life-cycle sections. A psychiatric diagnosis cross-reference allows nurses to find appropriate care plans with ease. Contents include an overview of the nursing process, adult psychiatric care, child and adolescent plans of care, geriatric plans of care, psychiatric disorders and their nursing diagnoses, psychotropic drugs, NANDA Taxonomy I revised, selected references, index. This is a Pageburst digital textbook; the product description may vary from the print textbook. The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, *The Nursing Process*,

effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more. New care plans, many that focus on the family, join completely updated and revised care plans to make this text the most comprehensive psychiatric nursing care planning text available. Dynamic internal design emphasizes the care plans as the focus of the text; tabbed pages noting the relevant disorder and a complete list of care plans with page number references make finding a specific care plan easier than ever before. Appropriate Nursing Interventions Classification (NIC) and Nursing Outcomes Classification (NOC) labels are presented with each care plan in order that students become familiar with these emerging classifications and practicing nurses can easily identify them for use in their care setting if applicable. A comprehensive pharmacotherapy appendix includes the most recent psychotropic drug information and appropriate related client care. Online Resources for the nurse, client, and family conclude each chapter. This handy Pocket Guide is a practical clinical reference for both psychiatric nurses and nursing students. Key Points to Remember outline the main concepts of each chapter in an easy to comprehend and concise bulleted list. Appendices feature the DSM-5 Classifications and a list of the latest NANDA-I diagnoses for readers' reference. This focused approach to psychiatric mental health provides you with an uncomplicated way to understand the often-intimidating subject of psychiatric nursing. Inside you'll find two themes of psychiatric mental health nursing: the "How" of Communication and the "Why" of Evidence. You will also find easy-to-understand explanations of the research that applies to psychiatric nursing issues and how to incorporate this evidence into everyday care. Emphasizes evidence-based practice related to nursing interventions and the profound impact of research on the advancement of treatment options for individuals with psychiatric disorders. UNIQUE! Examining the Evidence boxes ask a realistic question and then explore the research on the topic to demonstrate how best evidence can be used in everyday practice. Highlights therapeutic communication as a core component of mental health nursing and the foundation for successful nurse-patient relationships. UNIQUE! Applying the Art communication tables walk through nurse-patient interactions to illustrate therapeutic and nontherapeutic communication and provide explanations of mental health nursing concepts. Numerous vignettes offer real-life glimpses into clinical practice by describing patients and their psychiatric disorders. Potential Nursing Diagnoses tables give possible nursing diagnoses for a particular disorder along with the associated signs symptoms. Nursing Interventions tables list interventions for a given disorder or clinical situation, along with rationales for each intervention. Pharmacological, Biological, and Integrative Therapies sections of the clinical chapters cover the range of available treatments for a given disorder, including both traditional and non-traditional treatments. Key Points to Remember, Critical Thinking questions, and Chapter Review questions help you understand, apply, and remember important information. A companion CD, included with the text and Student Resources on Evolve, reinforce concepts with a variety of engaging learning tools. Learn the therapeutic skills you need to succeed in the nurse's role in psychiatric care! Psychiatric Nursing, 7th Edition uses a practical approach to psychotherapeutic management that clearly explains how to manage

and treat individuals with psychiatric disorders. It emphasizes the nurse's three primary tools: you and your relationship with patients, medications, and the environment. This edition adds a new chapter on forensics along with coverage of the latest trends and treatments. Written by educators Norman Keltner and Debbie Steele, this text provides a solid, real-world foundation for the practice of safe and effective psychiatric nursing care. Unique! A practical, three-pronged approach to psychotherapeutic management includes: 1) the therapeutic nurse-patient relationship, 2) psychopharmacology, and 3) milieu management. Unique! Norm's Notes offer helpful tips from the lead author, Norman Keltner, at the beginning of each chapter, making it easier to understand difficult topics. Nursing care plans highlight the nurse's role in psychiatric care, emphasizing assessment, planning, nursing diagnoses, implementation, and evaluation for specific disorders. Case studies depict psychiatric disorders and show the development of effective nursing care strategies. Unique! Putting It All Together summaries are provided at the end of each psychopathology chapter. Clinical examples from the authors' own experiences illustrate concepts with real-life clinical situations. Study Notes summarize each chapter's important content. Learning objectives at the beginning of each chapter preview the important principles to follow. Critical thinking questions help you develop clinical reasoning skills. Family Issues boxes highlight the issues that families must confront when a member suffers from mental illness. Learning resources on the Evolve companion website include video lectures, psychotropic drug monographs, and NCLEX® exam-style review questions. Patient and Family Education boxes highlight information that the nurse should provide to patients and families. A glossary defines key terms, providing a handy reference at the back of the book. NEW! DSM-5 information is integrated throughout the text, along with updated content and NANDA content. NEW! Survivors of Violence and Trauma chapter focuses on psychiatric treatment for individuals with mental illness in sex trafficking and forensic environments, along with the social implications for individuals, families, and communities. NEW! Integration of QSEN competencies highlights the competencies relevant to psychiatric nursing care such as safety, communication, evidence-based practice and others. NEW! Additional NCLEX® examination-style review questions on the Evolve companion website cover concepts likely to appear on class tests and the NCLEX exam. It's really 2 books in 1! The first half provides the diagnostic information needed to create a care plan; the second half covers the safe administration of psychotropic medications. And, the concepts can be applied to a variety of healthcare settings...from in-patient hospitalization through the outpatient clinic...to home health and private practice. Text Box: Vital information on selected topics is structured in text boxes. Brief, concise and lucid summary on key topics facilitate ease of learning.
