Hallmark features of this title Real data More than 90% of all examples, exercises, and problems use real data. Data sets increase statistical literacy. Larger data sets in the 7th Edition provide experience that aligns with what students are likely to do in future careers. Emphasis on interpreting results rather than just obtaining answers helps students develop statistical literacy and arrive at practical conclusions. Worked examples model this approach. Application and interpretation Your Turn feature in many examples directs students to a relevant exercise so they can immediately apply what they've learned. Flowcharts throughout simplify and clarify complex concepts and procedures. The optional print Student Workbook offers additional examples, concept exercises, and vocabulary exercises for each chapter. New and updated features of this title New content: Approximately 65% of Exercises, 57% of Examples and 100% of Chapter Problems are new to the 7th Edition. Significantly larger data sets in the 7th Edition are essential as students enter the age of big data and data science. New types of exercises: The Cumulative Review Exercises near the end of Chapters 9, 10, and 11 consist of open-ended questions that present students with a data set. Students are then asked to pose a key question relevant to the data, identify a procedure for addressing that question, and analyze the data to form a conclusion. 34 New Margin Essays highlight real-world topics, Big (or Very Large) Data Projects are new to the 7th Edition. Found near the end of each chapter, these ask students to think critically while using large data sets. New Chapter Problem icon marks Examples that relate to the Chapter Problem, to show how different statistical concepts and procedures can be applied to the real-world issue highlighted in the chapter. Features of MyLab Statistics for the 7th Edition Tech-Specific Video Tutorials are short, topical videos on how to use varying technologies to complete exercises. Chapter Review Videos are an updated review to help students understand key chapter concepts and examples. Section Lecture Videos feature Marty Triola working through examples and expanding on chapter objectives. All data sets are available for easy download for any statistical software and, where appropriate, auto-graded exercises use similar data sets so students get hands-on practice with the interpretation of real data. StatCrunch(R) software helps students analyze data sets easily from exercises and the text. Access to www.StatCrunch.com enables users to access tens of thousands of shared data sets, create and conduct online surveys, perform complex analyses, and generate reports. The StatCrunch Question Library makes it easy to assign projects or exercises. New version of Statdisk for the 7th Edition includes additional methods of resampling using bootstrapping and randomization. Statdisk is now a browser-based program that can be used on any device with a modern web browser, including laptops (Windows, macOS), Chromebooks, tablets, and smartphones.
