technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. Please note: This is a companion version & not the original book. Sample Book Insights: #1 The mystery of Whipple's success is why his commercials sold so much toilet paper. The answer is that they were extremely irritating, and people used the fast-forward button to avoid them. #2 The idea of Mr. Whipple, the advertiser, is not good. It is repetitive, schmaltzy, and cornball. But it is effective advertising, and it sells billions of rolls of toilet paper. #3 The public is cynical about advertising, and we send out every year the Gallup poll of most and least trusted professions. advertising practitioners trade last or second-to-last place with used car salesmen and members of Congress. #4 The 1950s saw the birth of modern advertising, with the concept of the unique selling proposition. This meant that advertisers would claim their products offered a specific benefit that no other product did. Following a deadly car crash, small-town lawyer Lance Cooper risked everything to battle one of the most powerful auto corporations in the world to get justice for a young woman. A fast-paced, journalistic account of tragedy turned to triumph, despair to hope, Cobalt Cover-Up is an inspirational, thoroughly compelling, and victorious read. In the midst of his own family struggles, small-town Georgia lawyer Lance Cooper agreed to defend Ken and Beth Melton and investigate the deadly accident that killed their daughter Brooke after she inexplicably lost control of her Chevy Cobalt. But what started as a heartbreaking yet all too common lawsuit quickly escalated into a David vs. Goliath case when Cooper discovered shocking evidence that General Motors concealed an ignition switch defect for nearly a decade--resulting in 124 deaths, including Brooke's, and risking the lives of millions more. Despite GM's settlement offers and attempts to bury evidence, Cooper refused to back down and worked tirelessly to expose the truth. Locked in a tenacious legal fight, Cooper and the Meltons faced incredible odds--Ken and Beth losing jobs and suffering the difficulty of grieving a beloved daughter during a court battle, Cooper risking his reputation and private practice against the overwhelming

opposition from GM's team of lawyers, and both parties facing massive financial strain. Yet, in the relentless pursuit for justice and to protect future innocent lives, this small-town lawyer and a working-class American couple stared down the biggest US auto manufacturing mogul and ultimately transformed the entire industry. Includes Part 1, Number 1: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - June) Please note: This is a companion version & not the original book. Sample Book Insights: #1 The core challenges of FAST MINDS traits include difficulty with focus, controlling behavior, and/or disorganization. They affect more than one area of life, and they cause significant problems. #2 A clinical diagnosis of ADHD should be made only when there is impairment from FAST MINDS-type traits. People with these traits may be living with the extra stress of being reactive rather than proactive, and they may suffer from demoralization, anxiety, or other distress because of the impact of their traits on their lives. #3 The FAST MINDS acronym can help people identify ADHD traits in themselves and others. It refers to the characteristics of the condition, but it also speaks to how some people feel: as if their brain works too fast for their own good. #4 The FAST MINDS traits are: forgetful, achieving below potential, stuck in a rut, time-challenged, motivationally challenged, impulsively behavior, and novelty seeking. They affect your day-to-day life and can be reflected on as we go through the book. Please note: This is a companion version & not the original book. Sample Book Insights: #1 The farm was 30 miles west of Wichita on the silty loam of southern Kansas. It had three nicknames: the breadbasket of the world, the air capital of the world, and tornado alley. The area was known for its government-subsidized grain production, airplane-manufacturing industry, and its tornadoes. #2 Betty and Arnie met at a dance, and after a few dates, she moved into his farmhouse. She learned how to cook for him and his field workers, and she fell in love with him. He treated her better than she had ever been treated. #3 After a few months, Arnie asked Betty to marry him. She thought she was done with all that, but she ended up marrying him outside the Church anyway, in September 1977, at a little chapel on a highway next to a trailer park.

#4 Arnie had a huge impact on my life, as he was the one who asked Betty to two-step. He was such a bright light for us that I thought of calling you after his middle name: August. This ebook collects the nearly 300 stories that first appeared in The Magazine, an independent biweekly periodical for narrative non-fiction. It covers researchers "crying wolf," learning to emulate animal sounds; DIY medical gear, making prosthetics and other tools available more cheaply and to the developing world; a fever in Japan that leads to a new friendship; saving seeds to save the past; the plan to build a giant Lava Lamp in eastern Oregon; Portland's unicycle-riding, Darth Vader mask-wearing, flaming bagpipe player; a hidden library at MIT that contains one of the most extensive troves of science fiction and fantasy novels and magazines in the world; and far, far more. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. Please note: This is a companion version & not the original book. Sample Book Insights: #1 Until the last decade of the last century, most Americans thought that terrorism was something that happened abroad. However, the attacks on the World Trade Center and the Pentagon on September 11, 2001, dramatically underscored the depth of animosity that some people have toward the United States. #2 There are five principal reasons why terrorists resort to using weapons of mass destruction: to kill as many people as possible, to exploit the fear of the population, to negotiate from a position of unsurpassed strength, and to show that the government is unable to fulfill its primary security function. #3 The threat of terrorists using nuclear, biological, and chemical materials is rising. It is important to try to eliminate the incentive for terrorists to use these weapons, because if the disruptive effects of terrorism can be sharply reduced, America's adversaries may be deterred from taking their battles to American soil. #4 The threat of nuclear, biological, and chemical terrorism is real and growing, and it requires that all of us take proactive steps to protect ourselves and our families.
