Collins's Introduction to the Hebrew Bible is one of the most reliable and widely adopted critical textbooks at undergraduate and graduate levels alike, and for good reason. Enriched by decades of classroom teaching, it is aimed explicitly at motivated students, regardless of their previous exposure to the Bible or faith commitments. The approach is ecumenical, in the sense that it seeks not to impose any particular theological perspective but to provide information and raise questions that should be relevant to any student. Collins proceeds through the canon of the Old Testament and the Apocrypha, judiciously presenting the current state of historical, archaeological, and literary understanding of the biblical text, and engaging the student in questions of significance and interpretation for the contemporary world. The third edition is presented in a new and engaging format with new maps and images. An index has been added to the volume for the first time. Defense of the Bible begins with rational proofs for the historicity and accuracy of its documents. Christ and the Bible places the argument for the authority of scripture squarely on Jesus. With uncluttered logic and straightforward prose Wenham marshals Gospel evidence to show Jesus' own view of Scripture-that it is (1) historically

accurate, (2) authoritative, (3) the standard for ethics, and (4) the verbally inspired revelation of God. He then considers why we should listen to Jesus when he makes such claims and why Christ's view should be the Christian view. The study substantiates Jesus' reliability influence on all New Testament writers. Finally, Wenham considers two related problems: first, which writings really belong in the Bible; second, the reliability of the text as now available. The presentation is easy to read and understand. This third edition updates and dialogs with recent developments.
