Introduction to Health and Safety in Construction Oct 23 2020 This NEBOSH-endorsed textbook is matched to the latest syllabus of the National Certificate in Construction Safety and Health. Within the construction industry the need for specialist health and safety training is high due to the high risks involved. This is reflected in recent legislation such as CDM 2007 and explains the consistent demand for courses and learning materials. The text is easy to read, highly illustrated in full color, and supported with checklists, report forms and record sheets used currently in the industry. Students are supported with end-of-chapter questions, a study skills chapter and specimen assignments including specimen answers. As NEBOSH actively grow their qualifications internationally, demand for this book and it's sister titles continues to increase overseas. High growth markets are the Middle East, Malaysia, India and China.

From the Source Mar 08 2022 Increased attention has been given in recent years to the effects of perinatal substance abuse on infants and children. The demand for programs targeting these populations has spiraled. Based on the experiences of 147 prevention and treatment projects, this guide was prepared as a resource for practitioners and program administrators seeking to establish and strengthen similar programs by providing practical knowledge on common implementation issues. Combining theory with practice, the guide provides common-sense advice, practical suggestions, and experience-based strategies in a user-friendly format.
