How the man manages to provoke her so much is beyond her. But he does, and really, she's just picking up the gauntlet he tosses her way. The terms of their little throwdown? Her business versus his in the arena of romance. And the stakes? Very likely, her heart. Chocolatier and town newcomer Luke Bradford loves his shop's new home. Partly because he couldn't ask for a better fresh start for both his professional and personal life, and partly (okay, mostly) because he gets to lock horns with the feisty beer-brewing beauty next door, and effectively push all her buttons on a fairly regular basis. To be fair, in his defense-- Just kidding. He has no defense. As far as the meddling matchmakers in this quirky little town are concerned, this is going to be their most unlikely (and interesting) pairing yet... "Violet Duke always writes such compelling, delightful characters who manage to pull you in and make you feel a part of their lives." -- #1 New York Times Bestselling Author Barbara Freethy ? AUTHOR NOTE ? Be forewarned, this slow-

burn romcom is definitely sweeter (and longer) than my other books (but there is still some on-page steam, as well as a few curse words--no f-bombs though, per usual). A book about a brewmaster and chocolatier battling over Valentine's Day supremacy? Yep, it was a given I was going to go all-out on the feel-good romance for this one. :) So if you're in the mood for a light and fun love story (with some of my token laugh-and-cry Violet Duke-ness, of course) between two stubbornly romantic characters who work hard for their happily ever after, this is the book for you! xoxo ? V THE CACTUS CREEK SERIES Love, Chocolate, and Beer [Luke & Dani] Love, Diamonds, and Spades [Rylan & Quinn] Love, Tussles, and Takedowns [Hudson & Lia] Love, Exes, and Ohs [Isaac & Xoey] All the Cactus Creek books are standalone novels with feel-good HEAs. :) Enjoy! Offering a comprehensive approach, this title covers fundamentals, technologies, and management of biological processing of solid waste. It discusses kinetic modeling and synergistic impact evolution during bioprocessing of solid waste, environmental impacts such as greenhouse gas emission from biological processing of solid waste, energy recovery from solid waste, and biodrying of solid waste. It also presents cases and challenges from different countries, successful business models, and economic analyses of various processing options. Aimed at researchers and industry professionals in solid and hazardous waste management, this title offers a wealth of knowledge to help readers understand this increasingly important area. Romance has met its most unlikely match-up... Luke Bradford is a chocolatier on a mission. After moving his chocolate shop, and newly single life, to the quirky town of Cactus Creek, Luke wants nothing more than to devote all his energy into making his business a success-by taking the romance market by storm. But his grand plans get thrown for a loop when he locks horns with the feisty beer-brewing beauty next door who calls his 'romantic idealism' a load of fairytale bull. Soon, driving the woman sparking nuts becomes another wickedly fun priority he simply can't get enough of. In his defense, she's addictively easy to incite...and plain impossible to resist. Beloved local brewmaster Dani Dobson is beyond riled up. It's bad enough the new shop owner in town comes locked and loaded with both a distractingly rugged charm and sexy flashing dimples, but the whole only-in-the-movies variety of romance he's selling-the kind her world has been crushed by before-is really doing a number on her allergy to unrealistic cliches. What's worse, he's created an annoyingly clever ad campaign that dubs 'beer joints' like hers as the "cave where romance goes to hibernate." The nerve of that man. Combustible chemistry or not, damn it, this means war. The stakes...very likely, her heart." Includes list of members, 1882-1902 and proceedings of the annual meetings and various supplements. Since the publication of the first edition of this book in 2003, the status of many important invasive plants around the world has changed dramatically. Species have extended their ranges, new literature has been accumulated, and control methods have been improved. Research on some plant invaders has also focused on the species' ecology and impacts, confirming that invasive plants continue to pose serious threats to species and ecosystems. Given their range expansions and introduction via international trade, these problems will only become more serious in the future. Including colour images of each species, this up-to-date reference guide on the most important plant invaders is an invaluable tool for both researchers and policy makers. The condensed chemical dictionary. Billed in early issues as "a practical journal of industrial progress", this monthly covers a broad range of topics in engineering, manufacturing, mechanics, architecture, building, etc. Later issues say it is "devoted to the advancement and diffusion of practical knowledge." This work provides those involved in water purification research and administration with a comprehensive resource of methods for analyzing water to assure its safety from contaminants, both natural and human caused. The book first provides an overview of major water-related issues in developing and developed countries, followed by a review of issues of sampling for water analysis, regulatory considerations and forensics in water quality and purity investigations. The subsequent chapters cover microbial as well chemical contaminations from inorganic compounds, radionuclides, volatile and semi-volatile compounds, disinfectants, herbicides, and pharmaceuticals, including endocrine disruptors, as well as potential terrorist-related contamination. The last chapter describes the Grainger prize-winning filter that can remove arsenic from water sources and sufficiently protect the health of a large number of people. - Covers the scope of water contamination problems on a worldwide scale - Provides a rich source of methods for analyzing water to assure its safety from natural and deliberate contaminants - Describes the filter that won the \$1 million Grainger prize and thereby highlighting an important approach to remediation A Dictionary of Science and Technology.
