This is the first textbook of Virtual Anthropology, the new science that combines elements from fields as diverse as anthropology, medicine, statistics, computing, scientific visualization, and industrial design. The book is intended for students in any of these or nearby fields within biology, medicine, or engineering and for teachers, journalists, and all others who will enjoy the many examples from our real biological world. After a general introduction to the field and an overview, the book is organized around six themes conveyed in more than 300 pages of text accompanied by hundreds of carefully annotated images: medical imaging and 3D digitising techniques, electronic preparation of individual specimens, analysis of complex forms in space one or many at a time, reconstruction of forms that are partly missing or damaged, production of real objects from virtual models, and, finally, thoughts about data accessibility and sharing and the implications of all this for the future of anthropology. The authors' emphasis is not on technical details but rather on step-by-step explanations of the wealth of examples included here, from brain evolution to surgical planning, always in light of the relevance of these approaches to science and to society. All readers are encouraged to try out the techniques on their own using the tools and data included in the Online Extra Materials resource. The Search for Good Wine is a highly entertaining and informative book on all aspects of wine and its consumption by nationally-syndicated wine columnist John Hailman, author of the critically-acclaimed Thomas Jefferson on Wine (2006). Hailman explores the wine-drinking experiences and tastes of famous wine-lovers from jolly Ben Franklin and the surprisingly enthusiastic George Washington to Julius Caesar, Sherlock Holmes, and Ernest Hemingway among numerous other famous figures. Hailman also recounts in fascinating detail the exotic life of the founder of the California wine industry, Hungarian Agoston Haraszthy, who introduced Zinfandel to the U.S. Hailman gives calm and reliable guidance on how to deal with snobby wine waiters and how to choose the best wine books and travel guides. He simplifies the ABCs of wine-grape types from the delicate pinot noirs of Oregon to the robust malbecs of Argentina and from the vibrant new whites of Spain to the great reds (old and new) of Italy. The entire book is dedicated to finding values in wine. As Hailman says, "Everyone always wants to know one basic thing: How can you get the best possible wine for the lowest possible price?" His new book is highly practical and effective in answering that eternal question and many more about wine. A judge at the top international wine competitions for over thirty years, Hailman examines those experiences and the value of "blind" tastings. He gives insightful tips on how to select a good wine store, how to decipher wine labels and wine

lists, and even how to extract unruly champagne corks without crippling yourself or others. Hailman simplifies wine jargon and effectively demystifies the culture of wine fascination, restoring the consumption of wine to the natural pleasure it really should be. A guide to Transmedia Storytelling. It is buzzword for a new generation - a revolutionary technique for telling stories across multiple media platforms and formats - and it's becoming the go-to strategy for businesses. It also shows you how to utilize the marketing tools used by heavy-hitters such as HBO, and Sony Pictures - at a fraction of cost. For decades fruit growers have sprayed their trees with toxic chemicals in an attempt to control a range of insect and fungal pests. Yet it is possible to grow apples responsibly, by applying the intuitive knowledge of our great-grandparents with the fruits of modern scientific research and innovation. Since The Apple Grower first appeared in 1998, orchardist Michael Phillips has continued his research with apples, which have been called "organic's final frontier." In this new edition of his widely acclaimed work, Phillips delves even deeper into the mysteries of growing good fruit with minimal inputs. Some of the cutting-edge topics he explores include: The use of kaolin clay as an effective strategy against curculio and borers, as well as its limitations Creating a diverse, healthy orchard ecosystem through understory management of plants, nutrients, and beneficial microorganisms How to make a small apple business viable by focusing on heritage and regional varieties, value-added products, and the "community orchard" model The author's personal voice and clear-eyed advice have already made The Apple Grower a classic among small-scale growers and home orchardists. In fact, anyone serious about succeeding with apples needs to have this updated edition on their bookshelf.

Whether you're sixty, eighty, ninety, or somewhere in between, Meena Vad's inspirational, informative, and spiritually charged debut handbook, *Yoga for Age 60+: A Guide to a New Journey of Safe Yoga Practice at Home*, is a smart read with a smart goal. With an engaging style and meticulously crafted illustrations, Vad prompts each of us to take control of our bodies and minds, because when it comes to the later years-our health is in our hands. Go ahead-strike a pose. After years of studying Sanskrit, Vedic literature, and Ayurveda, and working as a Software Engineer, Meena Vad compares the human brain to a supercomputer. Each of us has a huge memory-with different software and hard drives-and it all comes down to experiences and perspective. To her, the practice of yoga isn't confined to postures. Yoga depends on one's individual aptitudes, abilities, and preferences. It's about helping each of us manage the unique treasures of our journey and recharge our bodies and minds. Yoga also celebrates our attitude of wonder, curiosity, and joy towards that which allows us to remain in the flow of life. In twelve succinct chapters like "Yoga of Postures," "Yoga of Breathing (Pranayama)," "Yoga of Meditation (Dhyana Yoga)," "Yoga of Devotion (Bhakti Yoga)," and "Yoga for Specific Conditions," the author shows readers how to tap into vitality, inner peace, and harmony. With over half the book dedicated to learning postures with the help of detailed descriptions and illustrations, Vad allows readers to begin at home at their own pace. A third component of this yoga tutorial is a section of poses for specific health conditions. This allows readers to customize practice sequences to fit their individual needs. Whether you're interested in yoga as a curative measure or for increased strength, the journey to better health begins here. In *Yoga for Age 60+*, readers learn how a small amount of time doing yoga creates meaningful improvements in one's life. Step by step instructions with illustrations are included for beginners and new ways for enhancing the practice are explained for practitioners. As a further distinction from other yoga guides, Vad shows the way of yoga by focusing on an individual's biological and psychological age rather than one's chronological age. Here's to increased strength and power. Here's to good health-at any age. New York is a city of superlatives.
