Annual Review Of Plant Pathology Jun 14 2022 Plant Pathology has an important role to play in devising strategies suitable for sustainable agriculture. Some of the important steps to be taken by plant pathologists include the development of eco-friendly mechanisms of disease control through the use of biological resources, enhancing the resistant mechanisms of the plant through molecular means as well as studies on the interactions of biotic and abiotic stressors. The diversity of Agriculturally Important Microorganisms is far more than what we have found out till date and the function of these important microbes in agro-ecosystems is also equally diverse. The ability of plant growth promoting rhizobacteria, actinomycetes, plant growth promoting fungi, mycorrhiza, to influence plant growth depends upon the diverse mechanisms like phosphate solubilization, biological nitrogen fixation, phytohormone production, siderophore production, biological control of plant pathogens and direct or indirect induction of disease resistance. Application of these beneficial microorganisms in enriching soil and enhancing crop production will not only change the scenario of using harmful chemical fertilizers but will also open up new dimensions for utilizing microbial resources for sustainable agricultural practices. The present review covers a wide spectrum of articles which are pertinent in the present day context and gives an indication to readers of the role of plant pathology in the current agricultural scenario.

Harvard Law Review: Volume 127, Number 6 - April 2014 Aug 16 2022 The contents of Number 6 (Apr. 2014) include scholarly articles and student research, as well as the extensive, annual survey of Developments in the Law. This year's subject is SEXUAL ORIENTATION AND GENDER IDENTITY. Topics include "Pro-Gay and Anti-Gay Speech in Schools," "Transgender Youth and Access to Gendered Spaces in Education," "Classification and Housing of Transgender Inmates in American Prisons," "Animus and Sexual Regulation," and "Progress Where You Might Least Expect It: The Military's Repeal of 'Don't Ask, Don't Tell.'" Each year, the special Developments issue serves, in effect, as a new and detailed book on a cutting-edge legal subject. The issue also includes an article by Jill C. Anderson, "Misreading Like a Lawyer: Cognitive Bias in Statutory Interpretation," and an article by Ryan Bubb & Richard H. Pildes, "How Behavioral Economics Trims Its Sails and Why." In addition, student case notes explore Recent Cases on such diverse subjects as false advertising by disseminating scientific literature, free speech rights of professors in public universities, voter identification laws, sentencing by imposing the condition of penile plethysmography, aiding and abetting violations in international law, and whether intercepting unencrypted wi-fi violates the Wiretap Act. A further student work explores the recent administrative policy of the Social Security Administration's eliminating a surgical requirement for changing trans individuals' gender designation, and another explores a recent administration white paper on national security and whether bulk metadata collection violates the USA PATRIOT Act. Finally, the issue features several summaries of Recent Publications. The Harvard Law Review is offered in a quality digital edition, featuring active Contents, linked notes, active URLs in notes, and proper ebook and Bluebook formatting. The contents of Number 6 (Apr. 2014) include scholarly essays by leading academic figures, as well as substantial student research. The Review is a student-run organization whose primary purpose is to publish a journal of legal scholarship. The organization is formally independent of the Harvard Law School. Student editors make all editorial and organizational decisions.

New South African Review 6 Jul 23 2020 Wide-ranging essays demonstrate how the consequences of inequality extend throughout society and the political economy. Despite the transition from apartheid to democracy, South Africa is the most unequal country in the world. Its extremes of wealth and poverty undermine intensifying struggles for a better life for all. The wide-ranging essays in this sixth volume of the *New South African Review* demonstrate how the consequences of inequality extend throughout society and the political economy, crippling the quest for social justice, polarising the politics, skewing economic outcomes and bringing devastating environmental consequences in their wake. Contributors survey the extent and consequences of inequality across fields as diverse as education, disability, agrarian reform, nuclear geography and small towns, and tackle some of the most difficult social, political and economic issues. How has the quest for greater equality affected progressive political discourse? How has inequality reproduced itself, despite best intentions in social policy, to the detriment of the poor and the historically disadvantaged? How have shifts in mining and the financialisation of the economy reshaped the contours of inequality? How does inequality reach into the daily social life of South Africans, and shape the way in which they interact? How does the extent and shape of inequality in South Africa compare with that of other major countries of the global South which themselves are notorious for their extremes of wealth and poverty? South African extremes of inequality reflect increasing inequality globally, and *The Crisis of Inequality* will speak to all those general readers, policy makers, researchers and students who are demanding a more equal world.

The World Bank Legal Review Volume 6 Improving Delivery in Development Apr 12 2022 Voice, social contract, and accountability are discussed from the point of view of the function of law, justice, judicial systems and related areas from human rights to government policy, urban development, resource management, gender, social rights, economic reforms, governance, sustainable development and anti-corruption.
