Revolution and the Republic provides a new and wide-ranging interpretation of political thought in France from the eighteenth century to the present day. At its heart are the dramatic and violent events associated with the French Revolution of 1789 and the birth of the First Republic in 1792. For the next two centuries, writers in France struggled to make sense of these and subsequent events in French revolutionary history, producing a rich and perceptive analysis of the nature of republican government. But, as Revolution and the Republic shows, these important debates were not limited to the narrow confines of politics and to the writing of constitutions. Such was their significance that they occupied a central place in discussions about religion, science, philosophy, commerce, and the writing of history. They also shaped arguments about the character of France and the French nation as well as polemics about the role of intellectuals in French society. Moreover, they continue to be of importance in France today as the country faces the challenges posed by globalisation, multiculturalism, and the reform of the welfare state. Integrating the perspectives of intellectual history, political theory, social and cultural history, and political economy, Jeremy Jennings has written a study of political ideas that appeals to all those interested in the history of modern France and Europe more generally. This book offers a lively, communicative approach to modern languages, underpinned by a clear grammatical foundation, for pupils with a lower ability. Straightforward explanations of the way that the language works are accompanied by regular reading and writing practice activities. Travel narratives were the principal source of knowledge about the lands of the Near East and the Indian Ocean Basin in 17th-century France. Claiming the authority of first-hand observation, they paradoxically rely for their legitimization on the tropes of an established literary tradition. The status of these texts remained ambiguous, not least because of their anecdotal depictions of great riches, brutality or sexual promise. Drawing on the insights of post-colonial

scholarship, this study tackles a question given scant attention in previous work and suggests that beyond the hazy representation of the Orient, an opposition emerges between the threatening Near East and the indolent East Indies. Distinguishing recognizable representations from those generated by new encounters, this book questions the feasibility of cultural representation through travel, exploring a large corpus of original sources written by French ecclesiastics, gentlemen-travellers, ambassadors and adventurers. Linguistic, religious, cultural or geographical barriers meant most travellers remained distanced from the peoples about whom they would simultaneously become authoritative. The encounter was further transformed in narratives that were intended to entertain and to satisfy the criterion of curiosité. The 'Oriental' that emerges is a supremely variable entity, alternately naked or veiled, barbaric or civilized, menacing or attractive. Revisits, reassesses, and reclaims the legacy of May '68 in light of our present cultural and historical emergency. Continental Theory Buffalo is the inaugural volume of the Humanities to the Rescue book series, a public humanities project dedicated to discussing the role of the arts and humanities today. This book is a collaborative act of humanistic renewal that builds on the transcontinental legacy of May 1968 to offer insightful readings of the cultural (d)evolution of the last fifty years. The volume contributors revisit, reclaim and reassess the "revolutionary" legacy of May 1968 in light of the urgency of the present and the future. Their essays are effective illustrations of the potential of such interpretive traditions as philosophy, literature and cultural criticism to run interference with (and offer alternatives to) the instrumentalist logic and predatory structures that are reducing the world to a collection of quantifiable and tradeable resources. The book will be of interest to cultural historians and theorists, media studies scholars, political scientists, and students of French and Francophone literature and culture on both sides of the Atlantic. University of Maine. "Theophile Gautier a envoyé avec un feuilleton plus de trois mille personnes dans l'atelier de M. Ingres, wrote Champfleury in 1848. For artists, critics and readers alike, Gautier was the essential figure in French art journalism in the mid-nineteenth century. During the short-lived but pivotal period of the Second Republic, when the new administration was committed to reforming all the institutions of the fine arts, Gautier deployed the full resources of his brilliant, flexible and authoritative writing to support and direct these developments in ways compatible with his commitment to an idealist aesthetic, itself under growing pressure from alternative trends in an increasingly competitive art market. This first study of all Gautier's art journalism written during the Second Republic provides a long overdue reassessment of Gautier's importance in French nineteenth-century visual culture." More than fifty specialists have contributed to this new edition of volume 2 of *The Cambridge Bibliography of English Literature*. The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis, articulation and coordination that it has been retained in all its essentials for the new edition. The task of the new contributors has been to revise and integrate the lists of 1940 and 1957, to add materials of the following decade, to correct and refine the bibliographical details already available, and to re-shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries.
