Dogen's Manuals of Zen Meditation May 10 2022 Zen Buddhism is perhaps best known for its emphasis on meditation, and probably no figure in the history of Zen is more closely associated with meditation practice than the thirteenth-century Japanese master Dogen, founder of the Soto school. This study examines the historical and religious character of the practice as it is described in Dogen's own meditation texts, introducing new materials and original perspectives on one of the most influential spiritual traditions of East Asian civilization. The Soto version of Zen meditation is known as "just sitting," a practice in which, through the cultivation of the subtle state of "nonthinking," the meditator is said to be brought into perfect accord with the higher consciousness of the "Buddha mind" inherent in all beings. This study examines the historical and religious character of the practice as it is described in Dogen's own meditation texts, introducing new materials and original perspectives on one of the most influential spiritual traditions of East Asian civilization.

Fertility Regulation and the Public Health Jul 20 2020 A lifetime of work by a dedicated scientist who monitored the growing variety of methods for the control of human fertility and foresaw the need for information on the social, psychological, economic, and political aspects of fertility regulation and the prevention of unwanted pregnancies and births is reflected in the pages of this book. It also chronicles a series of related revolutions: (1) major changes in attitudes to the voluntary control of human fertility, (2) growing freedom of discussion outside the medical community relating to human reproduction, and (3) recognition that governments have an appropriate role to play in programs involving these matters. As a result, official information systems have been established to guide the evaluation of programs and determine if and when changes in policy might be needed. Christopher Tietze, from whose writings the articles in this volume were selected, was a central figure in these developments. He was a physician whose major focus was social statistics. In effect, he became the scorekeeper of the world's efforts to avoid unwanted childbearing. He enlisted an ever-growing network of collaborators and prevailed on them to apply new tools to new issues.

Image Processing and GIS for Remote Sensing Mar 28 2021 Following the successful publication of the 1st edition in 2009, the 2nd edition maintains its aim to provide an application-driven package of essential techniques in image processing and GIS, together with case studies for demonstration and guidance in remote sensing applications. The book therefore has a "3 in 1" structure which pinpoints the intersection between these three individual disciplines and successfully draws them together in a balanced and comprehensive manner. The book conveys in-depth knowledge of image processing and GIS techniques in an accessible and comprehensive manner, with clear explanations and conceptual illustrations used throughout to enhance student learning. The understanding of key concepts is always emphasised with minimal assumption of prior mathematical experience. The book is heavily based on the authors' own research. Many of the author-designed image processing techniques are popular around the world. For instance, the SFIM technique has long been adopted by ASTRIUM for mass-production of their standard "Pan-sharpen" imagery data. The new edition also includes a completely new chapter on subpixel technology and new case studies, based on their recent research.

Continental Scientific Drilling Project of the Cretaceous Songliao Basin (SK-1) in China Dec 05 2021 Continental Scientific Drilling Project of the Cretaceous Songliao Basin (SK-1) in China is the first reference to provide the results of the first part of scientific drilling project at the Songliao Basin in the Daqing oil field, the largest known oil field in China. The project has two major objectives: one is to correlate the oceanic and continental records and determine the principal drivers of climate change in order to assist in future climate change predictions and its influence on the earth's environment. The second is to further test the theory of terrestrial genesis of hydrocarbons, and to explore the formation of intra-continental sedimentary basins, as many are major hydrocarbon provinces. In addition, this project provides the scientific basis for exploration of the Daqing Oilfields, which have a yearly production of forty million tons of oil. The world is entering a new exciting era to explore in which scientific drilling will provide a quantum leap in our understanding of its deep earth and history. Continental Scientific Drilling Project of the Cretaceous Songliao Basin (SK-1) in China will play an important role in promoting scientific drilling and earth system science research. Summarizes the geological background, seismic profile, and tectonic evolution of the Songliao Basin Provides detailed information on drilling technology of SK-1, which successfully obtained ~2500m core with a recovery rate of ~95% Includes detailed core information: stratigraphic charts, core photographs, and core photograph identification tables
