With the US as the world's most prominent climate change outlaw, international pressure will not impel domestic action. The key to a successful global warming solution lies closer to home: in state–federal relations. Thomson proposes an innovative climate policy framework called “sophisticated interdependence.” This model is based on her lucid analysis of economic and political forces affecting climate change policy in selected US states, as well as on comparative descriptions of programs in Germany and Brazil, two powerful federal democracies whose policies are critical in the global climate change arena. What has happened on Nauru and Manus since Australia began its most recent offshore processing regime in 2012? This essential book provides a comprehensive and uncompromising overview of the first three years of offshore processing since it recommenced in 2012. It explains why offshore processing was re-established, what life is like for asylum seekers and refugees on Nauru and Manus, what asylum seekers, refugees and staff in the offshore detention centres have to say about what goes on there, and why the truth has been so hard to find. In doing so, it goes behind the rumours and allegations to reveal what is known – and what still is not known – about Australia's offshore detention centres. This book constitutes an excellent source of information for gaining a better understanding of information technologies in healthcare; for reviewing how healthcare will change as a consequence; and how to manage these changes in order to realise eHealth's full potential in creating value for patients, professionals and the system as a whole. The field of Human Resource Development (HRD) has grown in prominence as an independent discipline from its roots in both management and education since the 1980s. There has been continual debate about the boundaries of HRD ever since. Drawing on a wide and respected international contributor base and with a focus on international markets, this book provides a thematic overview of current knowledge in HRD across the globe. The text is separated into nine sections which explore the origins of the field, adjacent and related fields, theoretical approaches, policy perspectives, interventions, core issues and concerns, HRD as a profession, HRD around the world, and emerging topics and future trends. An epilogue rounds off the volume by considering the present and future states of the discipline, and suggesting areas for further research. The Routledge Companion to Human Resource Development is an essential resource for researchers, students and HRD professionals alike. This book aims at gauging whether the nature of US foreign policy decision-making has changed after the Cold War as radically as a large body of literature seems to suggest, and develops a new framework to interpret presidential decision-making in foreign policy. It locates the study of risk in US foreign policy in a wider intellectual landscape that draws on contemporary debates in historiography, international relations and Presidential studies. Based on developments in the health and environment literature, the book identifies the President as the ultimate risk-manager, demonstrating how a President is called to perform a delicate balancing act

between risks on the domestic/political side and risks on the strategic/international side. Every decision represents a 'risk vs. risk trade-off,' in which the management of one 'target risk' leads to the development 'countervailing risks.' The book applies this framework to the study three major crises in US foreign policy: the Cuban Missile Crisis, the seizure of the US Embassy in Tehran in 1979, and the massacre at Srebrenica in 1995. Each case-study results from substantial archival research and over twenty interviews with policymakers and academics, including former President Jimmy Carter and former Senator Bob Dole. This book is ideal for postgraduate researchers and academics in US foreign policy, foreign policy decision-making and the US Presidency as well as Departments and Institutes dealing with the study of risk in the social sciences. The case studies will also be of great use to undergraduate students. This book explores the persistence of the governance gap with respect to the human rights-impacting conduct of transnational extractive corporations operating in zones of weak governance. The authors launch their account with a fascinating case study of Talisman Energy's experience in Sudan, informed by their own experience as members of the 1999 Canadian Assessment Mission to Sudan (Harker Mission). Drawing on new governance, reflexive law and responsive law theories, the authors assess legal and other non-binding governance mechanisms that have emerged since that time, including the UN Guiding Principles on Business and Human Rights. They conclude that such mechanisms are incapable of systematically preventing human rights violating behaviour by transnational corporations, or of assuring accountability of these actors or recompense for victims of such violations. The authors contend that home state regulation, while not a silver bullet, has a crucial role to play in regulating such conduct. They pick up where UN Special Representative John Ruggie's Guiding Principles on Business and Human Rights left off, and propose an innovative, robust and adaptable template for strengthening the regulatory framework of home states. Their model draws insights from the theoretical literature, leverages existing public, private, transnational, national, 'soft' and hard regulatory tools, and harnesses the specific strengths of state-based governance. This book will be of interest to academics, policy makers, students, civil society and business leaders. This book analyses regional interventions in African conflict spaces by engaging with political discourse theory. Interventions are a performance of agency, but what happens if interventions are performed by forces that scholars have hardly ever considered as relevant agents in this regard? Based on a study of regional politics towards the crises in Burundi and Zimbabwe, the book analyses how these interventions shaped and changed the emerging regional interveners. The book engages political discourse theory, proposing an understanding of intervention as a field, in which multiple and heterogeneous interpretations of the violence, the crisis, and the future post-conflict order 'meet'. It is not hard to imagine that this encounter is not harmonious per se but full of

frictions. By making use of political discourse theory as a grammar for studying the complexity of an intervention, the focus is directed to the emerging subjectivities of regional interveners. This enables a view of regional interventions that neither reduces their subjectivity to universalist categories associated with 'liberal peace' nor overenthusiastically embraces them as the solution to all problems. This book will be of interest to students of international intervention, discourse theory, African politics, war and conflict studies, security studies and IR. Unaccompanied child asylum seekers are amongst the world's most vulnerable populations, and their numbers are increasing. The intersection of their age, their seeking asylum, and separation from their parents creates a specific and acute triple burden of vulnerability. Their precariousness has long been recognised in international human rights law. Yet, human rights-based responses have been subordinated to progressive global securitisation of irregular migration through interception, interdiction, extraterritorial processing and immigration detention. Such an approach necessitates an urgent paradigm shift in how we comprehend their needs as children, the impact of punitive border control laws on them, and the responsibility of States to these children when they arrive at their borders seeking asylum. This book reconceptualises the relationship between unaccompanied child asylum seekers and States. It proposes a new conceptual framework by applying international human rights law, childhood studies and vulnerability theory scholarship in analysing State obligations to respond to these children. This framework incorporates a robust analysis of the operation and impact of laws on vulnerable populations, a taxonomy for articulating the gravity of any consequent harms and a method to prioritise recommendations for reform. The book then illustrates the framework's utility using Australia's treatment of unaccompanied children as a case study. This book illuminates key learnings from human rights law, childhood studies and vulnerability theory and transforms them into a new roadmap for law reform. As such, it will be a valuable practice-based resource for practitioners, non-government organisations, advocates, policymakers and the general public interested in advocating for the rights of vulnerable populations as well as for academics, researchers and students of human rights law, refugee law, childhood studies and vulnerability studies. PDF can be downloaded for free from: <http://martenscentre.eu/publications/model-implementing-sustainable-and-qualitative-growth-eu> The period since the outbreak of the financial, economic and social crises in Europe has witnessed a renewed focus on the need to develop a more sustainable and qualitative growth model. A model where the traditional focus on economic growth (i.e. GDP growth) is complemented by an adherence to a wider range of qualitative indicators. Indicators which more broadly characterise the well-being of society as a whole. This paper defines a model for Sustainable and Qualitative Growth (SQG) in the EU and questions if existing EU economic and social governance arrangements are consistent with this wider approach to

building a sustainable growth model. This paper identifies a number of key recommendations. First, a more encompassing, balanced and multi-dimensional EU strategy for growth should be adopted. This refined strategy should take into account the broader indicators underpinning the SQG model and should be addressed in key EU documents such as the Annual Growth Survey. Second, a symmetric and time consistent macroeconomic strategy, allowing for investments in SQG related domains, should be pursued. These growth-enhancing investments should primarily target relevant policy areas such as education and training, technological innovation and lifelong learning strategies. Third, a common automatic stabiliser in the EU should be set up in order to provide a minimum level of EU investment across all member states. Details the paradigms of opportunistic spectrum sharing and white space access as effective means to satisfy increasing demand for high-speed wireless communication and for novel wireless communication applications This book addresses opportunistic spectrum sharing and white space access, being particularly mindful of practical considerations and solutions. In Part I, spectrum sharing implementation issues are considered in terms of hardware platforms and software architectures for realization of flexible and spectrally agile transceivers. Part II addresses practical mechanisms supporting spectrum sharing, including spectrum sensing for opportunistic spectrum access, machine learning and decision making capabilities, aggregation of spectrum opportunities, and spectrally-agile radio waveforms. Part III presents the ongoing work on policy and regulation for efficient and reliable spectrum sharing, including major recent steps forward in TV White Space (TVWS) regulation and associated geolocation database approaches, policy management aspects, and novel licensing schemes supporting spectrum sharing. In Part IV, business and economic aspects of spectrum sharing are considered, including spectrum value modeling, discussion of issues around disruptive innovation that are pertinent to opportunistic spectrum sharing and white space access, and business benefits assessment of the novel spectrum sharing regulatory proposal Licensed Shared Access. Part V discusses deployments of opportunistic spectrum sharing and white space access solutions in practice, including work on TVWS system implementations, standardization activities, and development and testing of systems according to the standards. Discusses aspects of pioneering standards such as the IEEE 802.22 “Wi-Far” standard, the IEEE 802.11af “White-Fi” standard, the IEEE Dynamic Spectrum Access Networks Standards Committee standards, and the ETSI Reconfiguration Radio Systems standards Investigates regulatory and regulatory-linked solutions assisting opportunistic spectrum sharing and white space access, including geo-location database approaches and licensing enhancements Covers the pricing and value of spectrum, the economic effects and potentials of such technologies, and provides detailed business assessments of some particularly innovative regulatory proposals The flexible and efficient use of

radio frequencies is necessary to cater for the increasing data traffic demand worldwide. This book addresses this necessity through its extensive coverage of opportunistic spectrum sharing and white space access solutions. *Opportunistic Spectrum Sharing and White Space Access: The Practical Reality* is a great resource for telecommunication engineers, researchers, and students.

A comprehensive history of one of the major players in the world of international finance. Over the course of its 150-year history, Deutsche Bank has established itself as a major player in the world of international finance, but has also been confronted by numerous challenges that have changed the face of Europe – from two world wars, to the rise and subsequent fall of communism. In this major work on the bank's history, Werner Plumpe, Alexander Nützenadel and Catherine R. Schenk deliver a vibrant account of the measures the bank undertook in order to address the profound upheavals of the period, as well as the diverse and unusual demands it had to face. These included the First World War, which brought the world's first period of globalization to a sudden and dramatic end, but also the development of the predominantly national framework within which the bank had to operate from 1914 until the fall of the Berlin Wall in 1989. More recently, the focus has shifted back to European and global activities, with Deutsche Bank forging new paths into the Anglo-American capital markets business – so opening another extraordinary chapter for the bank.

What is the role of water in the conversion of former industrial areas? How is water used in engaging the public to experience these sites both as physical and cultural places? Can ecological design foster the coexistence of industry and environment? The book addresses these core questions by examining the impact of the former Oregonian industry (1830-1940) on the Willamette River landscape and discussing how projects of transformation interpret the triangular interplay among industry, landscape and water. This book is a source of suggestions and ideas for scholars, students and professionals in architecture, landscape architecture, planning and their related fields who want to manage the urban landscapes successfully.

The Vietnam War lasted twenty years, and was the USA's greatest military failure. An attempt to stem the spread of Soviet and Chinese influence, the conflict in practice created a chaotic state torn apart by espionage, terrorism and guerilla warfare. American troops quickly became embroiled in jungle warfare and knowledge of the other side's troop movements, communication lines, fighting techniques and strategy became crucial. Panagiotis Dimitrakis uncovers this battle for intelligence and tells the story of the Vietnam War through the newly available British, American and French sources - including declassified material. In doing so he dissects the limitations of the CIA, the NSA, the MI6 and the French intelligence- the SDECE- in gathering actionable intelligence. Dimitrakis also shows how the Vietminh under Ho Chi Minh established their own secret services; how their high grade moles infiltrated the US and French military echelons and the government of South Vietnam, and how

Hanoi's intelligence apparatus eventually suffered seriously from 'spies amongst us' paranoia. In doing so he enhances our understanding of the war that came to define its era. This incisive book provides a much-needed examination of the legal issues arising from the data economy, particularly in the light of the expanding role of algorithms and artificial intelligence in business and industry. In doing so, it discusses the pressing question of how to strike a balance in the law between the interests of a variety of stakeholders, such as AI industry, businesses and consumers.

After *Ethnic Conflict: Policy-making in Post-conflict Bosnia and Herzegovina and Macedonia* investigates how sensitive policy issues can be resolved in the aftermath of war by investigating how political elites interact and make decisions in ethnically divided societies. Focussing on the interactions between political elites and attempts to reach agreement across ethnic lines in Bosnia and Macedonia the book examines the impact that institutional factors can have on political actors and the decisions they make. Examining domestic factors and external influence in politics, Cvete Koneska identifies four key drivers of post-conflict cooperation: cross-cutting identities, minority veto powers, territorial autonomy, and informal practices to explain inter-ethnic political accommodation. By looking beyond the immediate post-conflict landscape, created by foreign peace negotiators and aid missions, to the internal political process she shows the real reasons political actors cooperate and how competing ethnic tensions are reconciled following ethnic conflict. Delving deeper into specific policy areas to compare successful and unsuccessful attempts at ethnic accommodation this book explores the factors behind the different policy outcomes that sustain or undermine peace and ethnic cooperation in ethnically divided societies. This book summarizes the current state of research on strategic planning and offers an agenda for future research. The book edition comes with a new introduction that argues that strategising by public, non-profit and business organisations should be a major focus of research. Strategising is what links aspirations, capabilities, and implementation. Strategic planning should be viewed as one approach, but not the only approach, to strategising. A focus on strategising prompts researchers to consider issues of vertical and horizontal alignment of purpose, including across sectors; competence and scalability; co-production; decision-making and change management; and trust, transparency, authenticity and accountability. Additionally, the role of various strategising techniques and information technology should be analysed further. Beyond the book's introductory overview of the field, chapters focus on the following topics: planning styles collaboration, strategic plans, and government performance impacts of context and political responsibilities on government strategic planning efforts impacts of strategic planning in municipal governments impacts of austerity on strategic planning and government performance The chapters in this book were originally published as a special issue of the journal, *Public Management Review*. In this book, Katarzyna Granat

analyses and evaluates Europe's experience with the Early Warning System (EWS) which allows national parliaments to review draft legislative acts of the European Union for their compatibility with the subsidiarity principle. The EWS was introduced in response to the perceived 'democratic deficit' of the EU and its 'creeping' competences, and represented one of the landmark reforms of the Lisbon Treaty. The purpose of this book is to present and critically analyse the functioning of the new mechanism of subsidiarity review and the role that national parliaments have played within this system. Compared to the existing leading publications on the Europeanisation of national parliaments and contributions on the EU principle of subsidiarity, this book offers – for the first time – a profound legal analysis of the procedure enriched by a comprehensive empirical analysis of the activities of national parliaments. It is directed at scholars of EU law and policy, European and national officials, and legal practitioners working in and with the national legislatures. With the ongoing expansion of outbound foreign direct investment (FDI) in the countries representing the BRICS economic bloc (Brazil, Russia, India, China, and South Africa) – and with all of them at the same time listed among the top seven countries plagued by tax evasion and avoidance in the guise of illicit outflows – the governments, both individually and through cooperative initiatives, have devised new international tax strategies that are proving to be of great interest and value to other countries, both developing and developed. The core of these strategies addresses the necessity of stemming the outflow of revenue while strongly supporting FDI, both inbound and outbound while complying with international obligations including those arising from human rights laws. This book is the first in-depth commentary on this new and evolving area of international tax law. The detailed analysis covers the entire field of BRICS international tax law, considering topics such as the following: – information exchange procedures and pitfalls; – response to the OECD's Base Erosion and Profit-Sharing (BEPS) initiative; – role of bilateral and multilateral double taxation conventions including the Multilateral Instrument and the Bilateral Investment Treaties; – thin capitalization; – transfer pricing; – controlled foreign corporation rules; – shortcomings related to authorities' limited manpower; – international audit and investigation procedures; – the BRICS approach to residence and mandatory and binding arbitration; and – the BRICS approach to shaping the developing world's international tax system. Notably, the author personally conducted interviews with senior international representatives of the BRICS tax authorities, as well as with leading BRICS academics and practitioners. Tax cases, together with human rights and investment cases and administrative guidelines in all five countries are also included in the analysis. The study concludes with recommendations for improving each of the five countries' tax law and procedures, especially in the area of dispute resolution. The author's goal is to extend the existing body of knowledge of the BRICS' international tax laws in order to assist in developing an understanding of

the BRICS approach to dealing with evasion and avoidance: an approach which facilitates both outbound and inbound FDI, simplifies tax authority administration and establishes a basis for resolving international disputes which is compatible with sovereignty. In achieving this objective, the author has produced a major work that is of immeasurable value to tax advisers, government and governance officials, academics and researchers both in developing international taxation strategies and in helping to resolve disputes with tax authorities. In the past 10 years, the Member States of the European Union (EU) have intensified their exchange of information for the purposes of preventing and combating serious cross-border crime, as manifested in three main aspects. Firstly, there is a need to ensure the practical application of innovative principles (availability, mutual recognition) and concepts (Information Management Strategy, European Information Exchange Model) for tackling criminal organisations and networks that threaten the Internal Security of the EU. Secondly, there has been a gradual consolidation of EU agencies and bodies (Eurojust, Europol) aimed at promoting cooperation and dialogue among law enforcement officials and judicial authorities responsible for preventing and combating drug trafficking, trafficking in human beings, child pornography, and other serious trans-national offences. Thirdly, important EU information systems and databases (Prüm, SIS-II, ECRIS) have been created, enabling law enforcement and judicial authorities to gain access to essential information on criminal phenomena and organisations. Pursuing a practice-orientated approach, this work provides comprehensive coverage of all these measures, as well as the applicable rules governing data quality, data protection and data security. It is especially intended for law enforcement and judicial authorities who need to develop the appropriate expertise for the practical application of the above-mentioned principles. It also offers a solid basis of practical training material for police training centres and judicial schools.

This compelling, theoretically informed and up-to-date exploration of contemporary American cinema charts the evolution of the impact of 9/11 on Hollywood film from *Black Hawk Down* (2001), through *Batman Begins* (2005), *United 93* (2006) to *Olympus Has Fallen* (2013). Through a vibrant analysis of a range of genres and films - which in turn reveal a strikingly diverse array of social, historical and political perspectives - this book explores the impact of 9/11 and the war on terror on American cinema in the first decade of the new millennium and beyond. Extensive literature already exists on the causes and development of the recent financial crisis and the political measures taken to manage it. This book brings together a group of renowned social scientists to focus on the interplay between international, European and national decision-making processes in the reform of financial market regulation. Are those states affected by the crisis adopting internationally negotiated regulations? Or are they instead determining the European and international reform agenda? Are the policies being agreed contributing to greater harmonization of financial regulation in a multilevel

political system? Or is the process being dominated by differing national interests? The dominant concern of this book is the way in which the given multilevel structure of financial market regulation has shaped the reform process triggered by the recent financial crisis. Following an agreed set of questions, an international group of scholars deal in separate chapters with the role in the reform process played by international organizations, European authorities, and regulators in the USA, the United Kingdom, and Germany. To provide a detailed view of the vertical and horizontal interactions between these actors, the analysis focuses on a small set of reform issues, including bank structure, bank capital, resolution, and OTC trading of derivatives. The analysis shows to what extent actors at a given political level have both responded to, and shaped reform initiatives in other countries and at other political levels. Consideration is also given to a general shift in international governance, using financial market regulation as a case in point. The final chapter summarizes the pattern of multilevel policy-making resulting from the empirical analyses, highlighting features that distinguish it from familiar studies of multilevel governance in federal regimes and in the European Union. If you listen to some politicians and voices in the media, you might well believe that asylum seekers are 'illegal'. You might think that they should wait their turn in the so-called 'queue'. You might think that they pose a potential threat to our national security, and that the government is right to keep them from our shores. Or you might take a humanitarian stance, believing that drastic border protection policies, though harsh in effect, are necessary to deter asylum seekers from endangering their lives on risky boat journeys to Australia. However logical these conclusions might seem, the problem is that they are based on widespread misunderstandings about why and how people seek asylum, and what Australia's international legal obligations are. This book rejects spin and panic to provide a straightforward and balanced account of Australia's asylum policies in light of international law. Written for a general audience, it explains who asylum seekers and refugees are, what the law is, and what policies like offshore processing, mandatory detention, and turning back boats mean in practice. Using real-life examples, this book reminds us of the human impact of Australia's policies. This book, based on extensive field research, examines the Indian state's response to the multiple insurgencies that have occurred since independence in 1947. In reacting to these various insurgencies, the Indian state has employed a combined approach of force, dialogue, accommodation of ethnic and minority aspirations and, overtime, the state has established a tradition of negotiation with armed ethnic groups in order to bolster its legitimacy based on an accommodative posture. While these efforts have succeeded in resolving the Mizo insurgency, it has only incited levels of violence with regard to others. Within this backdrop of ongoing Indian counter-insurgency, this study provides a set of conditions responsible for the groundswell of insurgencies in India, and some recommendations to better formulate India's

national security policy with regard to its counter-insurgency responses. The study focuses on the national institutions responsible for formulating India's national security policy dealing with counter-insurgency – such as the Prime Minister's Office, the Cabinet Committee on Security, the National Security Council, the Ministry of Home Affairs and the Indian military apparatus. Furthermore, it studies how national interests and values influence the formulation of this policy; and the overall success and/or failure of the policy to deal with armed insurgent movements. Notably, the study traces the ideational influence of Kautilya and Gandhi in India's overall response to insurgencies. Multiple cases of armed ethnic insurgencies in Assam, Manipur, Mizoram, and Nagaland in the Northeast of India and the ideologically oriented Maoist or Naxalite insurgency affecting the heartland of India are analysed in-depth to evaluate the Indian counter-insurgency experience. This book will be of much interest to students of counter-insurgency, Asian politics, ethnic conflict, and security studies in general. For almost a hundred years from the 1860s, the City of London's overseas banks financed the global trade that lay at the core of the British Empire. Foremost among them from the beginning were two start-up ventures: the Standard Bank of South Africa, which soon developed a powerful domestic franchise at the Cape, and the Chartered Bank of India, Australia and China. This book traces their stories in the nineteenth century, their glory days before 1914 - and their remarkable survival in the face of global wars and the collapse of world trade in the first half of the twentieth century. The unravelling of the Empire after 1945 eventually forced Britain's overseas banks to confront a different future. The Standard and the Chartered, alarmed at the expansion of American banking, determined in 1969 on a merger as a way of sustaining the best of the City's overseas traditions. But from the start, Standard Chartered had to grapple with the fading fortunes of its own inherited franchise - badly dented in both Asia and Africa - and with radical changes in the nature of banking. Its British managers, steeped in the past, proved ill-suited to the challenge. By the late 1980s, efforts to expand in Europe and the USA had brought the merged Group to the brink of collapse. Yet it survived - and then pulled off a dramatic recovery. Standard Chartered realigned itself, just in time, with the phenomenal growth of Asia's 'emerging markets', many of them in countries where the Chartered had flourished a century earlier. In the process, the Group was transformed. Trebling its workforce, it brushed aside the global financial crisis of 2008 and by 2012 could look back on a decade of astonishing growth. Recent times have added an eventful postscript to a long and absorbing history. *Crossing Continents* recounts Standard Chartered's story with a wealth of detail from one of the richest archives available to any commercial bank. The book also affords a rare and compelling perspective on the evolution of international trade and finance, showing how Britain's commercial influence has actually worked in practice around the world over one hundred and fifty years. Written as EU-Russia relations

began their swift decline as a result of the Ukrainian crisis, this book examines the nature of these two actors' relationship in respect of their Partnership for Modernisation. The contributing authors look at modernisation through different lenses applying varying methodologies, delivering: historical analysis, economic analysis, levels-of-analysis debate, which brings along transnational, transgovernmental and intergovernmental relations and interrelations between the EU and its member states, discourse analysis, new institutionalism as well as policy analysis. The authors each identify the importance of modernisation for Russia, demonstrating why, despite the current state of relations between Moscow and Brussels, modernisation remains relevant for EU-Russian relations. At the same time, the plurality of the chapters shows the complexity of the relationship that will have to be taken into account in order to overcome the current crisis and construct sustainable and mutually beneficial relations. Heightened tensions in the South China Sea have raised serious concerns about the dangers of conflict in this region as a result of unresolved, complex territorial disputes. This volume offers detailed insights into a range of country-perspectives, addressing the historical, legal, structural, regional and multilateral dimensions of these disputes

Irish Water was set up in 2013 to introduce the most ambitious water metering programme in the world. The plan was to get Irish people to finally pay to upgrade a nineteenth-century water system. The water metering programme began in August 2013 and was carried out at breakneck speed. However, it did not go to plan and the issue of water charges divided Ireland. There were nationwide demonstrations, and confrontations in housing estates involving water meter contractors, gardai and water charge protesters. The programme ended in political disaster, with a humiliated government having to send out one million refunds. With access to unpublished documents, and interviews with the key personalities on both sides, *In Deep Water* provides a blow-by-blow account of how it all went wrong. The rows at cabinet. The warnings that went unheeded. The water women. The smartphone-wielding protesters. And the minister who threatened to reduce people's water to a trickle. Compulsively readable and fast paced, *In Deep Water* gives an inside view of the controversy that divided Ireland. A sweeping historical and political account of how our present-day policy debates around citizenship and equality came to be. The landmark Supreme Court decision in June 2015 legalizing the right to same-sex marriage marked a major victory in gay and lesbian rights in the United States. Once subject to a patchwork of laws granting legal status to same-sex couples in some states and not others, gay and lesbian Americans now enjoy full legal status for their marriages wherever they travel or reside in the country. For many, the Supreme Court's ruling means that gay and lesbian citizens are one step closer to full equality with the rest of America. In *Fragmented Citizens*, Stephen M. Engel contends that the present moment in gay and lesbian rights in America is indeed one of considerable advancement and change—but that there is still much to be

done in shaping American institutions to recognize gays and lesbians as full citizens. With impressive scope and fascinating examples, Engel traces the relationship between gay and lesbian individuals and the government from the late nineteenth century through the present. Engel shows that gays and lesbians are more accurately described as fragmented citizens. Despite the marriage ruling, Engel argues that LGBT Americans still do not have full legal protections against workplace, housing, family, and other kinds of discrimination. There remains a continuing struggle of the state to control the sexuality of gay and lesbian citizens—they continue to be fragmented citizens. Engel argues that understanding the development of the idea of gay and lesbian individuals as ‘less-than-whole’ citizens can help us make sense of the government’s continued resistance to full equality despite massive changes in public opinion. Furthermore, he argues that it was the state’s ability to identify and control gay and lesbian citizens that allowed it to develop strong administrative capacities to manage all of its citizens in matters of immigration, labor relations, and even national security. The struggle for gay and lesbian rights, then, affected not only the lives of those seeking equality but also the very nature of American governance itself. *Fragmented Citizens* is a sweeping historical and political account of how our present-day policy debates around citizenship and equality came to be. This brand new text offers a rich learning resource, combining extracts from leading cases and articles with insightful author commentary. This unique approach places employment law in context, enabling the reader to develop a clear and sophisticated understanding of this dynamic area. A running case study provides a practical perspective. Since 1995, Freedom House’s Nations in Transit series has monitored the status of democratic change from Central Europe to Eurasia, pinpointing the region’s greatest reform opportunities and challenges for the benefit of policymakers, researchers, journalists, and democracy advocates alike. International economic law, with its traditional focus on large multinational enterprises, is only slowly waking up to the new reality of small and medium-sized enterprises (SMEs), entering the global marketplace. In the wake of the digital revolution, smaller companies now play an important role in the global economic landscape. In 2015 the UN expressly called for SMEs to have greater access to international trade and investment, and it is increasingly recognized that the integration of SMEs provides one of the keys to creating a more sustainable and inclusive global economy. As SMEs increasingly permeate transnational supply chains, so interactions between these companies and international economic law and policy proliferate. *Small and Medium-sized Enterprises in International Economic Law* offers the first comprehensive analysis of the interaction between SMEs and international economic law. This book presents a broad international perspective, gathering together contributions by leading experts from academia, legal practice, and international organizations. It opens up a field of enquiry into this so far

unexplored dynamic and provide a touchstone for future debate. The analysis covers a broad spectrum of international trade and investment law focusing on issues of particular interest to SMEs, such as trade in services, government procurement, and trade facilitation. Diverse perspectives illuminate regional developments (in particular within the EU) and the implications of mega-regional free trade agreements. The essays also examine questions of legitimacy of global economic governance; in particular, concerns surrounding the threat posed to the interests of domestic SMEs by the growing liberalization of international trade and investment. These essays constitute essential reading for practitioners and academics seeking to navigate a previously neglected trend in international economic law. This book presents 22 topical contributions on international trade law and policy, with a particular focus on EU external trade law, addressing countries ranging from Ukraine to Switzerland and the US (TTIP) and aspects from trade and IPRs to anti-dumping. The volume constitutes a state-of-the-art treatment of the many facets of trade policy in the 21st century from legal, diplomatic and academic standpoints. The book is dedicated to the memory of Horst Günter Krenzler, former Director General for External Relations for the European Commission and Chief Negotiator for the European Union in many trade negotiations, honorary professor of European Union law at the University of Munich and an of counsel with Freshfields' Brussels office after retirement from the Commission. In *The EU-Ukraine Association Agreement and Deep and Comprehensive Free Trade Area*, Guillaume Van der Loo provides the first comprehensive legal analysis of this complex and controversial international agreement. Vidarbha—the parched heartland of central India—has become the foremost site of farmer suicides in the country. These suicides are the most striking indictment of the neglect of agriculture by the state. But the story of the farmers' distress does not end with their death—it lives on in the experience of their widows who struggle to survive in the shadows. *Widows of Vidarbha* tells the story of 16 such widows who have been invisible to the state, the community, and even their families, and talks of their lost dreams, their diminished worldviews, and their helpless surrender to the conveniences of patriarchy. These narratives throw light on the dark and desperate corners of their invisible world, one that reflects the state of farm widows across the country. *Orville Nix* is not the typical JFK assassination book. This book does not attempt to answer the question of who killed John F. Kennedy; instead, it addresses why we should question the actions of those involved and why the truth was withheld from the people. Though copies of Orville Nix's film exist, the original film is missing. Why? The FBI confiscated Orville's camera for several months, then returned it in pieces. Were these actions sinister or were they just examples of governmental incompetence? Orville Nix exposes information about the House Select Committee staff's involvement in the missing film. Author Gayle Nix Jackson's interviews with people who were close

to Orville and the film will shed light on the government's involvement with the filmmaker. Gayle Nix Jackson is the granddaughter of Orville Nix. As his eldest granddaughter, Nix Jackson shares experiences growing up with her beloved grandfather and on how his views changed after that fatal day. Hearing his story precipitated the quest Jackson is still on to find the film. Her grandfather was there that day for a reason, and if the original Nix film could be located, modern-day technology could determine if there was indeed another person behind the stockade fence or not. Questions still abound today as to whether or not the film was altered. Finding the original Nix film would answer one of the most enduring questions related to this horrific event: Was there a conspiracy to kill John F. Kennedy on November 22, 1963? Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home. This fourteenth volume of India's National Security Annual Review intensively analyses India's national security with respect to the changing internal and external dynamics. In the global environment, the situation is characterised by rising tensions between United States and Russia, intensified rivalry between United States (US) and China, and increasing cooperation between China and Russia. For India which seeks peaceful growth to emerge as a major power, this poses severe diplomatic challenges. This volume discusses the complexity of these challenges and the deftness with which India gets the best out of its strategic partnerships with the US and Russia while warding off the transgressions of a mighty adversary like China. It also studies the impact of internal convulsions and external intrusions on India's security from South Asian nations such as Afghanistan, Bangladesh, Nepal and Sri Lanka. Examining the field of internal security, the essays carry rare insights into the causes of expansion of Naxalite violence in tribal areas and the dynamics of conflict resolution in the Northeast, as well as India's deep concern as a growing power with its economic slowdown in the recent past, and energy and cyber security. Bringing together contributions from eminent scholars and diplomats, the volume will be indispensable for policymakers, government think tanks, defence and strategic studies experts, as well as students and researchers of international relations, foreign policy and political science.
