The Drava River Oct 04 2021 This monograph summarizes the environmental issues concerning the channel and the floodplain of the Drava River. It describes the diverse forms of human impact (river regulation, damming and reservoirs, dredging etc.) and the environmental changes of hydrological regime, sediment transport, biodiversity etc. involved. The transboundary nature of the river is emphasized and the resulting problems are outlined. Special attention is devoted to the evolution and present condition of the floodplain (drainage pattern, oxbow lakes and their vegetation). The possible solutions to environmental problems are illustrated by a review of ongoing and planned rehabilitation measures. The book is amply illustrated with maps, cross/sections, diagrams and photographs. The international team of authors (representing all countries crossed by the Drava River: Austria, Slovenia, Croatia and Hungary) approach the topic from different aspects. Thus, the reader is provided with a comprehensive picture of this, up until now, little studied European river.

Handbook of Evidence-Based Practices in Intellectual and Developmental Disabilities Oct 24 2020 This handbook presents a diverse range of effective treatment approaches for individuals with intellectual and developmental disabilities (IDD). Its triple focus on key concepts, treatment and training modalities, and evidence-based interventions for challenging behaviors of individuals with IDD provides a solid foundation for effective treatment strategies, theory-to-implementation issues, and the philosophical and moral aspects of care. With its quality-of-life approach, the handbook details practices that are person-centered and supportive as well as therapeutically sound. Topics featured in the handbook include: Functional and preference assessments for clinical decision making. Treatment modalities from cognitive behavioral therapy and pharmacotherapy to mindfulness, telehealth, and assistive technologies. Self-determination and choice as well as community living skills. Quality-of-life issues for individuals with IDD. Early intensive behavior interventions for autism spectrum disorder. Skills training for parents of children with IDD as well as staff training in positive behavior support. Evidence-based interventions for a wide range of challenging

behaviors and issues. The Handbook of Evidence-Based Practices in Intellectual and Developmental Disabilities is a must-have resource for researchers, clinicians, scientist-practitioners, and graduate students in clinical psychology, social work, behavior therapy, and rehabilitation.

Risk in the Global Real Estate Market May 11 2022 Essential reading for professional investors, risk managers, regulators, central bankers, and real estate professionals, Risk in the Global Real Estate Market: International Risk Regulation, Mechanism Design, Foreclosures, Title Systems, and REITs takes an international look at the ways in which U.S.-style constitutional laws, financial laws, and real estate laws in various countries affect global economics and risk; and analyzes specific constraints that deter market development such as Asset Liability Matching, inappropriate financial products, land title systems, inefficient constitutions and human biases. The sub-prime mortgage crisis (that began around 2006) and the Global Financial Crisis of 2007-2010 disrupted the economies of various countries and exposed many of the psychological, social, and economic problems inherent in the legal/risk infrastructure for mortgages, land title systems, REITs, securitization, and pensions. In this remarkable new book, Michael Nwogugu explains how these processes and statutes are unconstitutional and inefficient, and how they influence demand for housing, real estate prices, retirement savings, household wealth, consumer disposable income, marriage opportunities, job markets, crime, and regional economic growth. The resulting major economic and public health problems have continued to reduce the quality-of-life of nations, and continue to cause permanent declines in wealth, increases in crime and delinquency, high divorce rates, depression, and inadequate job creation, among other problems. The book examines a range of fields—including mechanism design, psychology, risk finance, and corporate governance; and emphasizes Constitutional economics as a distinct dimension of

risk analysis. Risk in the Global Real Estate Market makes a compelling case about how constitutional torts increase information asymmetry, transaction costs, agency problems, and compliance costs, as well as inefficiency in real estate transactions. These problems, the book argues, are not unique to the United States, but also affect Commonwealth countries and other nations that have developed regulations that are similar to, or are based on U.S. commercial, securities, and or constitutional laws. Risk in the Global Real Estate Market presents a novel analysis of the sub-prime crisis (that first began in 2006), the failure of securitization (CMBS/MBS) markets, the Global Financial Crisis, and socio-economic problems caused by traditional mortgages and securitization. The book reveals that many of the statutes and processes that define mortgages, foreclosures, securitization, and REITs in the United States (and many common-law countries and nations that have adopted American-style real estate regulations) are fundamentally unconstitutional and inefficient, and have lasting negative effects on consumer psychology, the demand for real estate, price discovery in property markets, economic growth, and quality of life. The book examines the nature of constitutional torts and property rights as the foundation for business transactions and economic growth within the context of risk regulation, interstate commerce, takings, and legislation. Risk in the Global Real Estate Market introduces new theories of consumer psychology and institutional dynamics in real estate transactions; presents new theories of takings, and also surveys psychology/psychiatry studies (based on data from various countries) that confirm the harmful effects of mortgages, securitization, and foreclosures. Using elements of mechanism design, Michael Nwogugu develops new efficient financial products (Mortgage-Alternatives products), and presents a policy framework for a unified "Mortgage-Alternatives" market for the CEE/CIS region and China. He also explains why Asset Liability Matching hinders lending, capital

formation and risk management, especially in developing countries.

Burden or Benefit: External Data Reporting Jan 15 2020

Blazing new trails in the area of reporting and transparency?

Required and voluntary reporting of student data to external agencies has increased in volume, quantity, and complexity, and understanding the scope of reporting requirements and the associated burden is critical to higher education practitioners.

This volume focuses on new directions in institutional reporting-- and the associated burden. The convergence of increased

reporting coupled with the demand to be more efficient with resources in a saturated and competitive higher education market

make this a timely and needed volume for higher education administrators. This is the 166th volume of this Jossey-Bass

quarterly report series. Timely and comprehensive, *New Directions for Institutional Research* provides planners and

administrators in all types of academic institutions with guidelines in such areas as resource coordination, information

analysis, program evaluation, and institutional management.

Compassion and Empathy in Educational Contexts Aug 14 2022

This book explores the importance of compassion and empathy within educational contexts. While compassion and empathy are widely recognised as key to living a happy and healthy life, there

is little written about how these qualities can be taught to

children and young people, or how teachers can model these traits in their own practice. This book shares several models of

compassion and empathy that can be implemented in schooling contexts, also examining how these qualities are presented in

children's picture books, films and games. The editors and

contributors share personal insights and practical approaches to improve both awareness and use of compassionate and

empathetic approaches to others. This book will be of interest and value to all those interested in promoting compassion and

empathy within education.

World-renowned bestselling authors, John Hattie and Eric M. Anderman have invited an international group of scholars to write brief, empirically-supported articles that examine predictors of academic achievement across a variety of topics and domains. Rather than telling people what to do in their schools and classrooms, this guide simply provides the first-ever compendium of research that summarizes what is known about the major influences shaping students' academic achievement around the world. Readers can apply this knowledge base to their own school and classroom settings. The 150+ entries serve as intellectual building blocks to creatively mix into new or existing educational arrangements and aim for quick, easy reference. Chapter authors follow a common format that allows readers to more seamlessly compare and contrast information across entries, guiding readers to apply this knowledge to their own classrooms, their curriculums and teaching strategies, and their teacher training programs.

Patients tend to be medically compromised and have a deep ambivalence towards their symptoms, and treatment dropout and relapse rates are high. Further complicating matters, a sizable number of patients present with additional characteristics that set them apart from the patients for whom empirically supported treatments were developed. Up to 50% of current ED diagnoses are classified as atypical and do not fit into existing diagnostic categories, and many more present with complex comorbidities. Clinical Handbook of Complex and Atypical Eating Disorders brings together into one comprehensive resource what is known about an array of complicating factors for patients with ED, serving as an accessible introduction to each of the comorbidities and symptom presentations highlighted in the volume. The first section of the book focuses on the treatment of ED in the presence of various comorbidities, and the second section explores the treatment of ED with atypical symptom presentations. The third section focuses on how to adapt ED treatments for diverse populations typically neglected in controlled treatment trials: LGBT, pediatric, male, ethnically diverse, and older adult populations. Each chapter includes a review of clinical presentation, prevalence, treatment approaches, resources, conclusions, and future directions. Cutting edge and practical, Clinical Handbook of Complex and Atypical Eating Disorders will appeal to researchers and health professionals involved in treating ED.

Handbook of Child and Adolescent Sexuality Sep 22 2020

Adolescent and child sexuality is studied by developmental psychologists from a research perspective and is of interest to forensic psychologists dealing with abuse and custody issues as well as rape cases. In many cases, it is of interest whether the child in question was sexually active to understand the extent to which an underage minor might have voluntarily participated in sexual activity as opposed to having been coerced. Previously, researchers interested in the applications of their research needed to look to separate books, and forensic specialists needed to look to development books to find the information they may have needed. This handbook provides both audiences with the related information they need. Encompasses normative behavior and clinical disorders in one source Applies the information on development and behavior to forensic issues Provides treatment information on sexual disorders in children Provides information on children and adolescents in one volume

Handbook of the Sociology of Education in the 21st Century Feb 14 2020 This handbook unifies access and opportunity, two key concepts of sociology of education, throughout its 25

chapters. It explores today's populations rarely noticed, such as undocumented students, first generation college students, and LGBTQs; and emphasizing the intersectionality of gender, race, ethnicity and social class. Sociologists often center their work on the sources and consequences of inequality. This handbook, while reviewing many of these explanations, takes a different approach, concentrating instead on what needs to be accomplished to reduce inequality. A special section is devoted to new methodological work for studying social systems, including network analyses and school and teacher effects. Additionally, the book explores the changing landscape of higher education institutions, their respective populations, and how labor market opportunities are enhanced or impeded by differing postsecondary education pathways. Written by leading sociologists and rising stars in the field, each of the chapters is embedded in theory, but contemporary and futuristic in its implications. This Handbook serves as a blueprint for identifying new work for sociologists of education and other scholars and policymakers trying to understand many of the problems of inequality in education and what is needed to address them.

S-Variable Approach to LMI-Based Robust Control Jul 01 2021

This book shows how the use of S-variables (SVs) in enhancing the range of problems that can be addressed with the already-versatile linear matrix inequality (LMI) approach to control can, in many cases, be put on a more unified, methodical footing. Beginning with the fundamentals of the SV approach, the text shows how the basic idea can be used for each problem (and when it should not be employed at all). The specific adaptations of the method necessitated by each problem are also detailed. The problems dealt with in the book have the common traits that: analytic closed-form solutions are not available; and LMIs can be applied to produce numerical solutions with a certain amount of conservatism. Typical examples are robustness analysis of linear systems affected by parametric uncertainties and the synthesis of a linear controller satisfying multiple, often conflicting, design specifications. For problems in which LMI methods produce conservative results, the SV approach is shown to achieve greater accuracy. The authors emphasize the simplicity and easy comprehensibility of the SV approach and show how it can be implemented in programs without difficulty so that its power becomes readily apparent. The S-variable Approach to LMI-based Robust Control is a useful reference for academic control researchers, applied mathematicians and graduate students interested in LMI methods and convex optimization and will also be of considerable assistance to practising control engineers faced with problems of conservatism in their systems and

controllers.

Politics and Heidegger's Concept of Thinking in

testjekennis.vhg.org

Contemporary Art Jan 19 2023 Responding to Heidegger's stark warnings concerning the essence of technology, this book demonstrates art's capacity to emancipate the life-world from globalized technological enframing. Louise Carrie Wales presents the work of five contemporary artists - Martha Rosler, Christian Boltanski, Krzysztof Wodiczko, and collaborators Noorafshan Mirza and Brad Butler - who challenge our thinking and compel a dramatic re-positioning of social norms and hidden beliefs. The through-line is rooted in Heidegger's question posed at the conclusion of his technology essay as understood through artworks that provides a counter to enframing while using increasingly sophisticated technological methods. The themes are political in nature and continue to have profound resonance in today's geopolitical climate. The book will be of interest to scholars working in art history, aesthetics, philosophy, and visual culture.
